

**So this guy from Iceland walks into GE and says**

„Ég þarf að framleiða 500 þúsund kW af raforku á 1000 fermílna svæði.“

**he needs 500,000 kilowatts of power in the middle of nowhere.**

**Then a customer calls from Dublin and says**

"Taistim airgead chun computers a cheannaig"

**She needs to finance computers for half the kids in Ireland.**

**At GE, our people hear two words...**

**“I need...”**

**...and that’s all they need to know: a customer needs answers and needs them now.**

**So we listen hard. And think fast.**

**That’s how GE helps airlines get engines that burn less fuel.**

**How GE helps doctors see a heart beating on the other side of the world.**

**How GE uses jet engine technology to make ships fly.**

**The way we see it, we don’t just work *for* our customers.**

**We work *with* them. And together there’s no problem we can’t solve.**

15 万トンの船を 30 ノットで航行させることのできる空力ガスタービンエンジンが必要なのです。

**Yep, even that.**
