

GE Equipment Services Asset Intelligence

VeriWise Solutions for Dry Vans

VeriWise™ is not just an asset location system – it is a fleet management system. Whether you're managing a trailer fleet of 10 or 10,000, running a tight, efficient operation is critical. But with so many demands on your time, trailer management can be a challenge. Unfortunately, without proper supervision, your company's assets could be at risk for under-utilization or loss.

Providing so much more than timed location reporting, the VeriWise system is intelligent and provides event-driven and exception-based information. In our VeriWise system for Dry Vans, GE has applied the knowledge gathered from years of development and on the road experience.

The VeriWise solution tells you where your available trailers are, which ones are carrying loads, which ones are being detained at the dock, and which ones are idle – right now.

The Smarter Trailer Fleet Management Solution

In order to effectively manage your trailer fleet, knowing where your trailer was yesterday evening or last night is not good enough. If it moved, most trailer tracking systems do not notify you until up to 24 hours later – after your driver spent time looking for it. Our unique motion sensor detects movement and reports beginning of drive and whether or not the trailer is hooked to tractor power. Our patented Cargo Sensor tells you whether the trailer is loaded or empty, and our web-based software application pulls it all together – so you are empowered to make smarter decisions.

Time-Tested and Customer Proven

GE works with some of the world's largest transportation companies to develop and deliver proven fleet management tracking solutions. Our combined satellite and cellular-based solutions portfolio is unmatched in the industry, and we have demonstrated that fleet management works – and pays. Put GE to work for you today and reap the rewards of managing your assets more efficiently with the VeriWise solution.

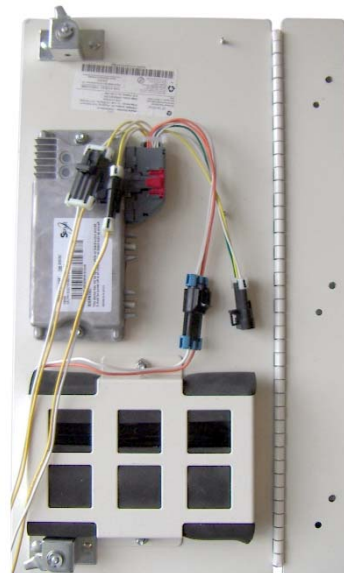

Features

- Self-contained solar powered
- Robust/serviceable design and installation
- Completely untethered operation
- Minimal install time, no 7-way wiring
- 5-10 year military-grade batteries
- Seamless global satellite coverage
- Most reliable SAE-grade connectors
- Can be upgraded to full-feature product
- J1455 Compliant
- Hinged-panel design allows for easy upgrade or maintenance

Web-based Interface

- User-defined landmarks
- User-defined event reporting
- Emergency track
- Start-of-drive and end-of-drive reports
- Over-the-air (OTA) operational changes
- Time scheduled reports and “pinging” 24/7
- Web-based interface
- TTIS-compatible XML interface
- 24-hours, toll-free customer service

VeriWise SATELLITE Dry Van SAT-D300

Feature	Benefit
Simple installation	Requires no connection to 7-way
Two-Way Radio	Capable of transmitting and receiving data/configuration information; ability to accept over-the-air (OTA) commands; ping/emergency track
Long Battery Life	Non-reliance on tractor power or frequency battery; charges through use of solar power; reduces cost of ownership; simpler installation; increases reliability
Upgradable to Full-Function SAT-D200	Accepts firmware and hardware (sensor); grows as your needs evolve
North American Coverage	Operates effectively in Canada, US, and Mexico; works wherever your trailer goes
Reliable	Six Sigma quality; reduces cost of ownership
Durable	Able to handle trailer environments and weather for 5-7 years; provides low maintenance
Scheduled Reports	Ability to report location up to twice per day on a scheduled basis; consistent tracking and location data for your fleet
Motion Report and Watchdog Messages	Ability to report end of drive (EOD) messages and to send a "watchdog" status message after 72 hours with no EOD; ability to capture load cycle vs. random locations; provides regular progress reports

About GE's Asset Intelligence

GE's Asset Intelligence represents the 'resource horsepower' of GE, deployed to address the challenges of the global supply chain. By leveraging the latest wireless communications and web technologies, the VeriWise satellite and cellular-based platforms provide intelligent solutions to provide shippers and carriers with tools to better manage fleets, freight, and maintenance operations. Quick access to actionable intelligence empowers you to make more informed decisions about securing and optimizing your asset portfolios and streamlining your supply chains.
