

VeriWise TRUCKING–Satellite Solutions for Refrigerated Trailers

VeriWise™ TRUCKING–Satellite for refrigerated trailers helps you monitor, manage, and optimize your refrigerated fleet. It gives you the power to examine your trailers activities; in turn providing knowledge that is crucial for better control of your company assets. The result? Optimal refrigerated trailer fleet management.

VeriWise TRUCKING–Satellite puts the power behind the knowledge to advance refrigerated trailer fleet management. Plus, it is installed inside the refrigerated unit so you get a covert installation along with the ability to install it on loaded trailers.

Time-Tested and Customer Proven

With 10 years of experience working with customers to develop and deliver proven trailer fleet management tracking solutions, and 50 years in the service of the transportation industry, we are driving the evolution with our customers. Our combined satellite and cellular based solutions portfolio is unmatched in the industry, and we have demonstrated that trailer fleet management works – and pays. Put GE to work for you today and reap the rewards of better fleet management.

Features

- Complete North American coverage
- Device-resident geofences
- User defined primary and secondary event reporting profiles
- User defined event message filtering
- User defined untethered listen modes
- Over-the-air (OTA) application software upgrade capable
- Web-based interface
- TTIS compliant XML
- Dispatch software integration
- 24 Hour Toll-Free Customer Service

Standard Hardware Features

- Delphi manufactured transceiver with integrated motion sensor
- Automotive-grade connectors
- Military-grade lead acid battery
- Hinged internal steel mounting plate

Optional Hardware

- Solar trickle charger
- Palm-based installation tool

Why GE?

More Information In Every Message

- Receive up to 10 events in every transmission, including location information, load status, beginning and end-of-drive and other available sensor data.

Best In Class Product Suite

- Motion sensor with alarm notification allows trailer to be "locked down."
- Detailed management reports and charts help users maximize efficiencies.
- Web-based interface delivers event-driven information, eliminates wasted time spent chasing equipment status.

Over-the-Air Programming

- GE makes system upgrades and enhancements wirelessly, eliminating the time and expense of taking trailers off the road.

Solid Customer Partnerships

- Leading transportation companies provide product insight and performance testing.

About Equipment Services

GE's Equipment Services business is a global provider of transport solutions for the world's supply chains. Offering a full range of equipment leasing and intelligence-based asset management and logistics services for manufacturers, retailers and shippers, Equipment Services enables the timely movement of raw materials and cargo for the global economy.

About GE's Asset Intelligence, a division of Equipment Services: GE's Asset Intelligence division represents the 'resource horsepower' of GE, deployed to address the challenges of the global supply chain. By leveraging the latest wireless communications and web technologies, the VeriWise (formerly FleetView from Terion) satellite and cellular based platforms provide intelligence based solutions to enable shippers and carriers with decision support tools to better manage their fleet, freight and maintenance operations. Quick access to actionable intelligence empowers customers to make more informed decisions about securing and optimizing their asset portfolios and streamlining their supply chains.
