

GE Capital Rail Services Aftermarket Group

Marine containers represent cost-effective transportation and storage options for a variety of commodities. GE can provide used equipment or put together a sales program for your underutilized assets

If your marine transport and storage equipment requirements are growing, or your existing equipment isn't located where you really need it, putting to work available, used equipment can be a very smart way to go. That's where GE Capital Aftermarket Group can help.

With a far-reaching network of worldwide locations, we're able to put the right equipment to work for you, when you need it and where you need it. Aftermarket Group represents a single source, with multiple delivery and fulfillment options, for a variety of marine container types:

- Dry Cargo Containers
- Refrigerated Containers
- Specialized Containers
- Flat Racks
- Ventilated Containers
- Open Tops

Through the operational strengths of GE Capital and GE SeaCo we've established a solid reputation for providing our customers with a broad range of equipment, as well as comprehensive service and financing options. As Aftermarket Group, we have in place the experience and expertise to make sure that you get the greatest return on your equipment investments:

- *An inventory management system with fast access to a variety of equipment, anywhere in the world*
- *Clear, concise, accurate transaction processes*
- *Consistent service and quality*
- *Pricing, credit and financing options that fit your requirements*

Doing business with GE Capital Aftermarket Group means dependable equipment and flexible choices so you'll make the most of your opportunities today, tomorrow and on down the line.
