

GE
Intermodal Services

We understand the ups
and downs of the system.

 imagination at work

Intermodal is in our system – and our system is evolving with the industry.

With more than 100 years of shipping experience of managing one of the industry's largest fleet of intermodal assets, we've learned how to ride the waves of seasonal demand spikes and economic cycles.

We offer an unmatched combination of innovation, industry expertise and financial strength that enables our customers to optimize supply chain dynamics and improve their service and financial performance. Whether you're looking for same-day access to a variety of container, chassis and trailer types, or a long-term relationship that encompasses leasing, equipment management, aftermarket services, and maintenance & repair, we're wired to be your "go-to" resource.

Structuring deals to meet your financial goals

The right equipment with the right financing can help you compete more rigorously in the marketplace. GE Intermodal Services offers a wide variety of financial options tailored to your needs.

Whether you need short-term options to handle surge capacity or long-term leases for new equipment, we'll work with you to find creative alternatives to help you achieve your financial goals. Our expertise extends throughout GE, giving us the resources to structure the right deal for your company.

The right equipment

GE Intermodal Services has invested heavily in equipment, so you'll have the exact assets you need – where and when you need them. We provide the following types of intermodal equipment:

Chassis

We offer 53-foot and 48-foot equipment on short-term rentals, long-term leases or purchases of pre-owned equipment.

- 53-foot – Extendable and gooseneck chassis provide the flexibility necessary for handling the full spectrum of intermodal loads. The frame assembly is designed to be easily adjusted for use with 45-foot marine containers, 48-foot domestic or marine containers and 53-foot domestic containers.
- 48-foot – Our gooseneck chassis are a durable, yet lightweight alternative to traditional over-the-road vehicles, offering better weight distribution for maximum payload.

Containers

Whether for daily rental or long-term operating lease, our containers offer shipping advantages, including larger cubic capacity and larger payload capabilities. All containers are built to AAR specifications with 53-foot or 48-foot models available.

Trailers

Our quality-built, late-model vans – available on daily rental or long-term operating leases – make your unloading operations easier and minimize your risk of downtime. We provide a fleet of 53-foot, 48-foot and 45-foot trailers at many convenient locations throughout the U.S.

The following leasing structures are available:

- [Operating Leases](#)
- [Daily Rental](#)
- [Finance Leases](#)
- [International Leasing Products](#)

Daily Rental for Intermodal Trailers

Our Trailer Management Programs (TMHZ) and (TMPZ) are designed to provide you with a daily private trailer option. This innovative product offers you the flexibility you need with no commitment to use and no charge to sign up. It includes a fleet of 53-foot and 48-foot trailers which operate on a non-specific lane network originating out of our yards in Chicago, Jacksonville, Los Angeles and Cincinnati. Key termination cities include Chicago, Jacksonville, Los Angeles, Cincinnati, Ayer, Morrisville and Rutherford. Please see our website for a complete list of termination cities. <http://www.ge.com/railservices/products/intermodal/trailermng.html>

The GE Advantage

- Easy to use and 'best-in-class' reservation system with customizable customer reporting
- Proven success rate with private trailer management
- 24 hour Customer Service
- Strategic drop locations throughout the US
- Established maintenance and repair process for private marks
- NO HASSLE empty returns with established EDI process
