

# GE Capital Rail Services Aftermarket Group

Railcars represent a cost-effective transportation and storage option for a variety of commodities. As one of the largest lessors of railcars, GE can provide used equipment at competitive costs.

---

Railcars deliver unmatched advantages for cost-effective transport and storage of a variety of commodities, like coal, paper, chemicals, and more. Used railcars make a lot of sense financially and operationally, especially when your challenges include asset management with limited cash in the face of shifting demand. The trouble is finding, selecting and executing the right deal on the right used railcars can be a tedious and uncertain process.

That's where we can help. We're GE Capital, Aftermarket Group and we're positioned to provide you with one of the largest, most diverse railcar fleets in the world. With a far-reaching network of locations, multiple delivery and fulfillment options, we're able to put to work the right equipment for you, when you need it and where you need it:

- Jumbo hoppers
- Box cars
- Covered hoppers
- Gondola cars
- Plastic pellet cars
- Specialty cars

Through the operational strengths of GE Capital, we've established a solid reputation for helping our customers with a broad range of equipment, service and financing choices. We're well-known for concise, convenient and accurate transaction processes. As the Aftermarket Group, we have the global reach, the local focus and the industry expertise to make sure that you gain the greatest return on your equipment investments.

When it comes to putting used railcar equipment to work, nobody can help you move your business forward like GE Capital, and its Aftermarket Group.
