Caution Concerning Forward-Looking Statements: This document contains "forward-looking statements"—that is, statements related to future, not past, events. In this context, forward-looking statements often address our expected future business and financial performance, and often contain words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," or "will." Forward-looking statements by their nature address matters that are, to different degrees, uncertain. For us, particular uncertainties arise from the behavior of financial markets, including fluctuations in interest rates and commodity prices, from future integration of acquired businesses, from future financial performance of major industries which we serve, including, without limitation, the air and rail transportation, energy generation and healthcare industries, from unanticipated loss development in our insurance businesses, and from numerous other matters of national, regional and global scale, including those of a political, economic, business, competitive or regulatory nature. These uncertainties may cause our actual future results to be materially different than those expressed in our forward-looking statements. We do not undertake to update our forward-looking statements.
