

Tim Schweikert
President & CEO, China Region
GE Technology Infrastructure

Tim Schweikert graduated from Marquette University in 1984 with a BS in mechanical engineering.

Upon graduation Tim joined GE Aircraft Engines as a manufacturing development program engineer. During this time, Tim earned a masters in science in industrial engineering degree from the University of Cincinnati. Tim served in a variety of leadership positions in engineering, product management, marketing and sales while with GE Aircraft Engines. Tim was appointed General Manager of Global Locomotive Operations at GE Transportation in December 2003, overseeing the launch of the Evolution Series locomotive and the acceleration of GE's global locomotive business.

In February of 2006, Tim was appointed President, GE Transportation China, leading one of GE's fastest growing businesses in China.

In November of 2007 Tim was appointed President & CEO China Region of GE Technology Infrastructure. In his new position, Tim continues his current leadership for Transportation, and also assumes the additional leadership for GE Technology Infrastructure China Operations.

Tim was promoted to a GE Corporate Vice President in June 2008.
