

STC (Supplier Technical Collaboration)

The STC is a PO or a RFQ folder (STCP for PO and STCZ for RFQ) in the PLM GTCC /Enovia to allow documents exchange between GE and suppliers.

How GE send documents to suppliers thru a STC ?

On a STC GE use two main objects :

- TDP (technical definition package) to send technical documents, drawings, specifications.
- LD (Line Deliverable) to send non-technical documents, specific to the project.

STCP-410 [redacted] STCP-41 [redacted] Maturity State : **Active** → Closed

GE_STC_TechnicalC...

STCP-41 [redacted]

Line Item Name ▲	GE Part Description	Part Deliverable	Technical Definition Package Name	Line Item Deliverable
00010	EXCEPTION, VALVE...		GETDP-0000056913	GE_STC_SupplierDeliv...
00020	EXCEPTION, VALVE...		GETDP-0000056913	GE_STC_SupplierDeliv...

When you receive a PO or a RFQ from GE, please enter the PO or RFQ number in GTCC and open TDP and LD to download them.

SD (Supplier Deliverable)

The SD is like an empty letter box available to collect supplier document thru the STC

How suppliers submit documents to GE thru a STC ?

- 1) The first step is to **create a supplier document** which will stay available in your library (Supplier document menu)
- 2) Then you can open the appropriate STCP, open the LD (line Deliverable) and search the SD for which you want to submit the document.
- 3) Upload your document in SD and click on the button “Submit to GE”
