With up to 95% assembly in the factory, the LM2500XPRESS was created for speed and simplicity. The LM2500XPRESS comes pre-packaged in 10 simplified modules for easy installation and features 27 electrical interconnects vs. 130+ for a traditional plant, as well as greatly reduced mechanical interconnects. Module systems flushing is completed at the factory, so customers don’t need to flush on-site. For customers who need power in days, not weeks, the LM2500XPRESS can be installed in about 14 days by 20 people. Its plug and play nature lets you get power to the grid quickly and efficiently, or provides industrial companies the ability to get up and running fast.
