Excerpt from upstream's README:

Since GnuTLS version 3.1.10, the core library has been released under the GNU Lesser General Public License (LGPL) version 2.1 or later.

Note, however, that version 6.0.0 and later of the gmplib library used by GnuTLS are distributed under a LGPLv3+ or GPLv2+ dual license, and as such binaries of this library need to adhere to either LGPLv3+ or GPLv2+ license.

The GNU LGPL applies to the main GnuTLS library, while the included applications as well as gnutls-openssl library are under the GNU GPL version 3. The gnutls library is

libgnutls30/copyright: Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for

libgnutls30/copyright: For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related

libgnutls30/copyright: 1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights

libgnutls30/copyright: the right to reproduce, adapt, distribute, perform, display, communicate, and translate moral rights retained by the original author(s) and/or performer(s);

libgnutls30/copyright: publicity and privacy rights pertaining to a person's image or likeness depicted in a rights protecting against unfair competition in regards to a Work, subject to the rights protecting the extraction, dissemination, use and reuse of data in a Work;

libgnutls30/copyright: database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and

libgnutls30/copyright: other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.
libgnutls30/copyright: 2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently, irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer’s Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the “Waiver”). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer’s heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, or modification.

libgnutls30/copyright: 3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer’s express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer

libgnutls30/copyright: 4. Limitations and Disclaimers.

libgnutls30/copyright: No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.

libgnutls30/copyright: Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the Work, express, implied, statutory or otherwise, including without limitation warranties of title, merchantability, fitness for a particular purpose, non infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible

libgnutls30/copyright: Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person’s Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other

libgnutls30/copyright: Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this CC0 or use of the Work.

libgnutls-openssl27/copyright:
libgnutls-openssl27/copyright: The laws of most jurisdictions throughout the world automatically confer
exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all,
an "owner") of an original work of authorship and/or a database (each, a "Work").
libgnutls-openssl27/copyright:
libgnutls-openssl27/copyright: Certain owners wish to permanently relinquish those rights to a Work for the
purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can
reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse
and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation
commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and
the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for

of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the

the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

GCC RUNTIME LIBRARY EXCEPTION

Version 3.1, 31 March 2009

Copyright (C) 2009 Free Software Foundation, Inc. <http://fsf.org/>

Everyone is permitted to copy and distribute verbatim copies of this
license document, but changing it is not allowed.

This GCC Runtime Library Exception ("Exception") is an additional
permission under section 7 of the GNU General Public License, version
3 ("GPLv3"). It applies to a given file (the "Runtime Library") that
bears a notice placed by the copyright holder of the file stating that
the file is governed by GPLv3 along with this Exception.

When you use GCC to compile a program, GCC may combine portions of
certain GCC header files and runtime libraries with the compiled
program. The purpose of this Exception is to allow compilation of
non-GPL (including proprietary) programs to use, in this way, the
header files and runtime libraries covered by this Exception.

0. Definitions.

A file is an "Independent Module" if it either requires the Runtime
Library for execution after a Compilation Process, or makes use of an
interface provided by the Runtime Library, but is not otherwise based
on the Runtime Library.

"GCC" means a version of the GNU Compiler Collection, with or without
modifications, governed by version 3 (or a specified later version) of
the GNU General Public License (GPL) with the option of using any
subsequent versions published by the FSF.

"GPL-compatible Software" is software whose conditions of propagation,
modification and use would permit combination with GCC in accord with
the license of GCC.

"Target Code" refers to output from any compiler for a real or virtual
architecture, in executable form or suitable for
input to an assembler, loader, linker and/or execution
phase. Notwithstanding that, Target Code does not include data in any
From Ubuntu 16.04 LTS

libgomp1/copyright:format that is used as a compiler intermediate representation, or used
libgomp1/copyright:for producing a compiler intermediate representation.
libgomp1/copyright:
libgomp1/copyright:The "Compilation Process" transforms code entirely represented in
libgomp1/copyright:non-intermediate languages designed for human-written code, and/or in
libgomp1/copyright:Java Virtual Machine byte code, into Target Code. Thus, for example,
libgomp1/copyright:use of source code generators and preprocessors need not be considered
libgomp1/copyright:part of the Compilation Process, since the Compilation Process can be
libgomp1/copyright:understood as starting with the output of the generators or
libgomp1/copyright:preprocessors.
libgomp1/copyright:
libgomp1/copyright:A Compilation Process is "Eligible" if it is done using GCC, alone or
libgomp1/copyright:with other GPL-compatible software, or if it is done without using any
libgomp1/copyright:work based on GCC. For example, using non-GPL-compatible Software to
libgomp1/copyright:optimize any GCC intermediate representations would not qualify as an
libgomp1/copyright:Eligible Compilation Process.
libgomp1/copyright:
libgomp1/copyright:1. Grant of Additional Permission.
libgomp1/copyright:
libgomp1/copyright:You have permission to propagate a work of Target Code formed by
libgomp1/copyright:combining the Runtime Library with Independent Modules, even if such
libgomp1/copyright:propagation would otherwise violate the terms of GPLv3, provided that
libgomp1/copyright:all Target Code was generated by Eligible Compilation Processes. You
libgomp1/copyright:may then convey such a combination under terms of your choice,
libgomp1/copyright:consistent with the licensing of the Independent Modules.
libgomp1/copyright:
libgomp1/copyright:2. No Weakening of GCC Copyleft.
libgomp1/copyright:
libgomp1/copyright:The availability of this Exception does not imply any general
libgomp1/copyright:presumption that third-party software is unaffected by the copyleft
libgomp1/copyright:requirements of the license of GCC.

libgpm2/copyright: This is Debian GNU/Linux's prepackaged version of the General Purpose Mouse Interface utility. The general purpose mouse daemon tries to be a useful mouse server for applications running on the Linux console.

libgpm2/copyright: This package was put together by, James Troup <james@nocrew.org>.

libgpm2/copyright: Now maintained as a team by:

libgpm2/copyright:   Guillem Jover <guillem@debian.org>
libgpm2/copyright:   Peter Samuelson <peter@p12n.org>

libgpm2/copyright: The upstream source was downloaded from:

libgpm2/copyright: The initial changes while packaging were minor :-

libgpm2/copyright: - adding support for the Debian package maintenance scheme, by adding various debian/* files.
libgpm2/copyright: - gpm.c (processConn): type of socket length changed (size_t -> socklen_t).
libgpm2/copyright: - debuglog.c: #include <string.h> to quiet -Wall.
libgpm2/copyright: - doc/Makefile.in (maintainer-clean): clean without interaction and clean all relevant files (i.e. gpm.info-{1,2}).
libgpm2/copyright: - doc/Makefile.in: add support for mouse-test.1.

libgpm2/copyright: The following changes were thought of and done mostly by François Gouget <fgouget@mygale.org>; though I didn't apply his patches as they were for various reasons:

libgpm2/copyright: - gpm.c (cmdline): modified handling of -t command line argument, so it can be used by anyone regardless of whether or not a copy of gpm is already running.
libgpm2/copyright: - gpm.c (usage): update for new -t option "types".
libgpm2/copyright: - mice.c: improved descriptions of mouse types.
libgpm2/copyright: - mice.c (M_listMice): function used by -t help, reworked version of old M_listTypes.
libgpm2/copyright: - mice.c (M_listTypes): function used by -t types; lists only mnemonics.

The libitm1 library is licensed under the terms of the GNU General Public License, with a special exception:

- Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License cover the whole combination.
- As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

libitm1/copyright:This GCC Runtime Library Exception ("Exception") is an additional
libitm1/copyright:permission under section 7 of the GNU General Public License, version
libitm1/copyright:3 ("GPLv3"). It applies to a given file (the "Runtime Library") that
libitm1/copyright:bears a notice placed by the copyright holder of the file stating that
libitm1/copyright:the file is governed by GPLv3 along with this Exception.
libitm1/copyright:
libitm1/copyright:When you use GCC to compile a program, GCC may combine portions of
libitm1/copyright:certain GCC header files and runtime libraries with the compiled
libitm1/copyright:program. The purpose of this Exception is to allow compilation of
libitm1/copyright:non-GPL (including proprietary) programs to use, in this way, the
libitm1/copyright:header files and runtime libraries covered by this Exception.
libitm1/copyright:
libitm1/copyright:0. Definitions.
libitm1/copyright:
libitm1/copyright:A file is an "Independent Module" if it either requires the Runtime
libitm1/copyright:Library for execution after a Compilation Process, or makes use of an
libitm1/copyright:interface provided by the Runtime Library, but is not otherwise based
libitm1/copyright:on the Runtime Library.
libitm1/copyright:
libitm1/copyright:"GCC" means a version of the GNU Compiler Collection, with or without
libitm1/copyright:modifications, governed by version 3 (or a specified later version) of
libitm1/copyright:the GNU General Public License (GPL) with the option of using any
libitm1/copyright:subsequent versions published by the FSF.
libitm1/copyright:
libitm1/copyright:"GPL-compatible Software" is software whose conditions of propagation,
From Ubuntu 16.04 LTS

libitm1/copyright: From Ubuntu 16.04 LTS
libitm1/copyright: modification and use would permit combination with GCC in accord with
libitm1/copyright: the license of GCC.
libitm1/copyright:
libitm1/copyright: "Target Code" refers to output from any compiler for a real or virtual
libitm1/copyright: target processor architecture, in executable form or suitable for
libitm1/copyright: input to an assembler, loader, linker and/or execution
libitm1/copyright: phase. Notwithstanding that, Target Code does not include data in any
libitm1/copyright: format that is used as a compiler intermediate representation, or used
libitm1/copyright: for producing a compiler intermediate representation.
libitm1/copyright:
libitm1/copyright: The "Compilation Process" transforms code entirely represented in
libitm1/copyright: non-intermediate languages designed for human-written code, and/or in
libitm1/copyright: Java Virtual Machine byte code, into Target Code. Thus, for example,
libitm1/copyright: use of source code generators and preprocessors need not be considered
libitm1/copyright: part of the Compilation Process, since the Compilation Process can be
libitm1/copyright: understood as starting with the output of the generators or
libitm1/copyright: preprocessors.
libitm1/copyright:
libitm1/copyright: A Compilation Process is "Eligible" if it is done using GCC, alone or
libitm1/copyright: with other GPL-compatible software, or if it is done without using any
libitm1/copyright: work based on GCC. For example, using non-GPL-compatible Software to
libitm1/copyright: optimize any GCC intermediate representations would not qualify as an
libitm1/copyright: Eligible Compilation Process.
libitm1/copyright:
libitm1/copyright: 1. Grant of Additional Permission.
libitm1/copyright:
libitm1/copyright: You have permission to propagate a work of Target Code formed by
libitm1/copyright: combining the Runtime Library with Independent Modules, even if such
libitm1/copyright: propagation would otherwise violate the terms of GPLv3, provided that
libitm1/copyright: all Target Code was generated by Eligible Compilation Processes. You
libitm1/copyright: may then convey such a combination under terms of your choice,
libitm1/copyright: consistent with the licensing of the Independent Modules.
libitm1/copyright:
libitm1/copyright: 2. No Weakening of GCC Copyleft.
libitm1/copyright:
libitm1/copyright: The availability of this Exception does not imply any general
libitm1/copyright: presumption that third-party software is unaffected by the copyleft

libjpeg-turbo8/copyright: In plain English:

1. We don't promise that this software works. (But if you find any bugs,
   please let us know!)
2. You can use this software for whatever you want. You don't have to pay us.
3. You may not pretend that you wrote this software. If you use it in a
   program, you must acknowledge somewhere in your documentation that
   you've used the IJG code.

The authors make NO WARRANTY or representation, either express or implied,

All Rights Reserved except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this
software (or portions thereof) for any purpose, without fee, subject to these
libjpeg-turbo8/copyright: (1) If any part of the source code for this software is distributed, then this
libjpeg-turbo8/copyright: README file must be included, with this copyright and no-warranty notice
libjpeg-turbo8/copyright: unaltered; and any additions, deletions, or changes to the original files
libjpeg-turbo8/copyright: must be clearly indicated in accompanying documentation.

libjpeg-turbo8/copyright: (2) If only executable code is distributed, then the accompanying
libjpeg-turbo8/copyright: documentation must state that "this software is based in part on the work of
libjpeg-turbo8/copyright: the Independent JPEG Group".

libjpeg-turbo8/copyright: (3) Permission for use of this software is granted only if the user accepts
libjpeg-turbo8/copyright: full responsibility for any undesirable consequences; the authors accept
libjpeg-turbo8/copyright: NO LIABILITY for damages of any kind.

libjpeg-turbo8/copyright: These conditions apply to any software derived from or based on the IJG code,

- **All languages:**
  - libgcc1, libgcc2, libgcc4: GCC intrinsics (platform-dependent)
  - gcc-5-base: Base files common to all compilers
  - gcc-5-soft-float: Software floating point (ARM only)
  - gcc-5-source: The sources with patches

- **Ada:**
  - libgnatvsn-dev, libgnatvsn5: GNAT version library
  - libgnatprj-dev, libgnatprj5: GNAT Project Manager library

- **C:**
  - cpp-5, cpp-5-doc: GNU C Preprocessor
  - libssp0-dev, libssp0: GCC stack smashing protection library
  - libquadmath0: Math routines for the __float128 type
  - fixincludes: Fix non-ANSI header files

- **Java:**
  - gjij: The Java bytecode interpreter and VM
  - libgcj-common: Common files for the Java run-time
  - libgcj10-awt: The Abstract Windowing Toolkit
  - libgcj10-jar: Java ARchive for the Java run-time

- **C, C++, and Fortran 95:**
  - libgomp1-dev, libgomp1
  - libitm1-dev, libitm1

Biarch support: On some 64-bit platforms which can also run 32-bit code, Debian provides additional packages containing 32-bit versions of some libraries. These packages have names beginning with 'lib32' instead of 'lib', for example lib32stdc++6. Similarly, on some 32-bit platforms which can also run 64-bit code, Debian provides additional packages with names beginning with 'lib64' instead of 'lib'. These packages contain 64-bit versions of the libraries. (At this time, not all platforms and not all libraries support biarch.) The license terms for these lib32 or lib64 packages are identical to the ones for the lib packages.

liblsan0/copyright:
liblsan0/copyright:This GCC Runtime Library Exception ("Exception") is an additional
liblsan0/copyright:permission under section 7 of the GNU General Public License, version
liblsan0/copyright:3 ("GPLv3"). It applies to a given file (the "Runtime Library") that
liblsan0/copyright:bears a notice placed by the copyright holder of the file stating that
liblsan0/copyright:the file is governed by GPLv3 along with this Exception.
liblsan0/copyright:
liblsan0/copyright:When you use GCC to compile a program, GCC may combine portions of
liblsan0/copyright: certain GCC header files and runtime libraries with the compiled
liblsan0/copyright:program. The purpose of this Exception is to allow compilation of
liblsan0/copyright:non-GPL (including proprietary) programs to use, in this way, the
liblsan0/copyright:header files and runtime libraries covered by this Exception.
liblsan0/copyright:
liblsan0/copyright:0. Definitions.
liblsan0/copyright:
liblsan0/copyright:A file is an "Independent Module" if it either requires the Runtime
liblsan0/copyright:Library for execution after a Compilation Process, or makes use of an
From Ubuntu 16.04 LTS

liblsan0/copyright:interface provided by the Runtime Library, but is not otherwise based
liblsan0/copyright:on the Runtime Library.
liblsan0/copyright:
liblsan0/copyright:"GCC" means a version of the GNU Compiler Collection, with or without
liblsan0/copyright:modifications, governed by version 3 (or a specified later version) of
liblsan0/copyright:the GNU General Public License (GPL) with the option of using any
liblsan0/copyright:subsequent versions published by the FSF.
liblsan0/copyright:
liblsan0/copyright:"GPL-compatible Software" is software whose conditions of propagation,
liblsan0/copyright:modification and use would permit combination with GCC in accord with
liblsan0/copyright:the license of GCC.
liblsan0/copyright:
liblsan0/copyright:"Target Code" refers to output from any compiler for a real or virtual
liblsan0/copyright:target processor architecture, in executable form or suitable for
liblsan0/copyright:input to an assembler, loader, linker and/or execution
liblsan0/copyright:phase. Notwithstanding that, Target Code does not include data in any
liblsan0/copyright:format that is used as a compiler intermediate representation, or used
liblsan0/copyright:for producing a compiler intermediate representation.
liblsan0/copyright:
liblsan0/copyright:The "Compilation Process" transforms code entirely represented in
liblsan0/copyright:non-intermediate languages designed for human-written code, and/or in
liblsan0/copyright:Java Virtual Machine byte code, into Target Code. Thus, for example,
liblsan0/copyright:use of source code generators and preprocessors need not be considered
liblsan0/copyright:part of the Compilation Process, since the Compilation Process can be
liblsan0/copyright:understood as starting with the output of the generators or
liblsan0/copyright:preprocessors.
liblsan0/copyright:
liblsan0/copyright:A Compilation Process is "Eligible" if it is done using GCC, alone or
liblsan0/copyright:with other GPL-compatible software, or if it is done without using any
liblsan0/copyright:work based on GCC. For example, using non-GPL-compatible Software to
liblsan0/copyright:optimize any GCC intermediate representations would not qualify as an
liblsan0/copyright:Eligible Compilation Process.
liblsan0/copyright:
liblsan0/copyright:1. Grant of Additional Permission.
liblsan0/copyright:
liblsan0/copyright:You have permission to propagate a work of Target Code formed by
liblsan0/copyright:combining the Runtime Library with Independent Modules, even if such
liblsan0/copyright:propagation would otherwise violate the terms of GPLv3, provided that
liblsan0/copyright:all Target Code was generated by Eligible Compilation Processes. You
liblsan0/copyright:may then convey such a combination under terms of your choice,
liblsan0/copyright:consistent with the licensing of the Independent Modules.
liblsan0/copyright:
liblsan0/copyright:2. No Weakening of GCC Copyleft.
liblsan0/copyright:
liblsan0/copyright:The availability of this Exception does not imply any general

liblsan0/copyright: presumption that third-party software is unaffected by the copyleft
liblsan0/copyright: requirements of the license of GCC.

liblzma5/copyright: Comment:
liblzma5/copyright: XZ Utils is developed and maintained upstream by Lasse Collin. Major
liblzma5/copyright: portions are based on code by other authors; see AUTHORS for details.
liblzma5/copyright: Most of the source has been put into the public domain, but some files
liblzma5/copyright: have not (details below).
liblzma5/copyright: .
liblzma5/copyright: This file describes the source package. The binary packages contain
liblzma5/copyright: some files derived from other works: for example, images in the API
liblzma5/copyright: documentation come from Doxygen.
liblzma5/copyright: License:
liblzma5/copyright: Different licenses apply to different files in this package. Here
From Ubuntu 16.04 LTS

liblzma5/copyright: is a rough summary of which licenses apply to which parts of this
liblzma5/copyright: package (but check the individual files to be sure!):
liblzma5/copyright: .
liblzma5/copyright: - liblzma is in the public domain.
liblzma5/copyright: .
liblzma5/copyright: - xz, xzdec, and lzmadec command line tools are in the public
liblzma5/copyright: domain unless GNU getopt_long had to be compiled and linked
liblzma5/copyright: in from the lib directory. The getopt_long code is under
liblzma5/copyright: GNU LGPLv2.1+.
liblzma5/copyright: .
liblzma5/copyright: - The scripts to grep, diff, and view compressed files have been
liblzma5/copyright: adapted from gzip. These scripts and their documentation are
liblzma5/copyright: under GNU GPLv2+.
liblzma5/copyright: .
liblzma5/copyright: - All the documentation in the doc directory and most of the
liblzma5/copyright: XZ Utils specific documentation files in other directories
liblzma5/copyright: are in the public domain.
liblzma5/copyright: .
liblzma5/copyright: - Translated messages are in the public domain.
liblzma5/copyright: .
liblzma5/copyright: - The build system contains public domain files, and files that
liblzma5/copyright: are under GNU GPLv2+ or GNU GPLv3+. None of these files end up
liblzma5/copyright: in the binaries being built.
liblzma5/copyright: .
liblzma5/copyright: - Test files and test code in the tests directory, and debugging
liblzma5/copyright: utilities in the debug directory are in the public domain.
liblzma5/copyright: .
liblzma5/copyright: - The extra directory may contain public domain files, and files
liblzma5/copyright: that are under various free software licenses.
liblzma5/copyright: .
liblzma5/copyright: You can do whatever you want with the files that have been put into
liblzma5/copyright: the public domain. If you find public domain legally problematic,
liblzma5/copyright: take the previous sentence as a license grant. If you still find
liblzma5/copyright: the lack of copyright legally problematic, you have too many
liblzma5/copyright: lawyers.
liblzma5/copyright: .
liblzma5/copyright: As usual, this software is provided "as is", without any warranty.
liblzma5/copyright: .
liblzma5/copyright: If you copy significant amounts of public domain code from XZ Utils
liblzma5/copyright: into your project, acknowledging this somewhere in your software is
liblzma5/copyright: polite (especially if it is proprietary, non-free software), but
liblzma5/copyright: naturally it is not legally required. Here is an example of a good
liblzma5/copyright: notice to put into "about box" or into documentation:
liblzma5/copyright: .
liblzma5/copyright: This software includes code from XZ Utils <http://tukaani.org/xz/>.
From Ubuntu 16.04 LTS

liblzma5/copyright: The following license texts are included in the following files:
liblzma5/copyright:   - COPYING.LGPLv2.1: GNU Lesser General Public License version 2.1
liblzma5/copyright:   - COPYING.GPLv2: GNU General Public License version 2
liblzma5/copyright:   - COPYING.GPLv3: GNU General Public License version 3
liblzma5/copyright: Note that the toolchain (compiler, linker etc.) may add some code
liblzma5/copyright: pieces that are copyrighted. Thus, it is possible that e.g. liblzma
liblzma5/copyright: binary wouldn't actually be in the public domain in its entirety
liblzma5/copyright: even though it contains no copyrighted code from the XZ Utils source
liblzma5/copyright: package.

liblzma5/copyright: COPYING says that most docs are in the public domain. Maybe that's not
liblzma5/copyright: clear enough, but on the other hand it looks a bit stupid to put
liblzma5/copyright: copyright information in tiny and relatively small docs like README.
liblzma5/copyright: I don't dare to say that _all_ XZ Utils specific docs are in the public
liblzma5/copyright: domain unless otherwise mentioned in the file. I'm including PDF files
From Ubuntu 16.04 LTS

liblzma5/copyright: generated by groff + ps2pdf, and some day I might include Doxygen-
liblzma5/copyright: generated HTML docs too. Those don't include any copyright notices, but
liblzma5/copyright: it seems likely that groff + ps2pdf or at least Doxygen put some
liblzma5/copyright: copyrighted content into the generated files.

liblzma5/copyright: changelog.gz (commit 975d8fd) explains:
liblzma5/copyright: .
liblzma5/copyright: Recreated the BCJ test files for x86 and SPARC. The old files
liblzma5/copyright: were linked with crt*.o, which are copyrighted, and thus the
liblzma5/copyright: old test files were not in the public domain as a whole. They
liblzma5/copyright: are freely distributable though, but it is better to be careful
liblzma5/copyright: and avoid including any copyrighted pieces in the test files.
liblzma5/copyright: The new files are just compiled and assembled object files,
liblzma5/copyright: and thus don't contain any copyrighted code.

The libgcj library is licensed under the terms of the GNU General Public License, with a special exception:

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

GCC RUNTIME LIBRARY EXCEPTION

Version 3.1, 31 March 2009

Copyright (C) 2009 Free Software Foundation, Inc. <http://fsf.org/>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This GCC Runtime Library Exception ("Exception") is an additional permission under section 7 of the GNU General Public License, version 3 ("GPLv3"). It applies to a given file (the "Runtime Library") that bears a notice placed by the copyright holder of the file stating that the file is governed by GPLv3 along with this Exception.

When you use GCC to compile a program, GCC may combine portions of certain GCC header files and runtime libraries with the compiled program. The purpose of this Exception is to allow compilation of non-GPL (including proprietary) programs to use, in this way, the header files and runtime libraries covered by this Exception.

0. Definitions.

A file is an "Independent Module" if it either requires the Runtime Library for execution after a Compilation Process, or makes use of an interface provided by the Runtime Library, but is not otherwise based on the Runtime Library.

"GCC" means a version of the GNU Compiler Collection, with or without modifications, governed by version 3 (or a specified later version) of the GNU General Public License (GPL) with the option of using any subsequent versions published by the FSF.

"GPL-compatible Software" is software whose conditions of propagation, modification and use would permit combination with GCC in accord with the license of GCC.

"Target Code" refers to output from any compiler for a real or virtual target processor architecture, in executable form or suitable for input to an assembler, loader, linker and/or execution phase. Notwithstanding that, Target Code does not include data in any
From Ubuntu 16.04 LTS

libmpx0/copyright:format that is used as a compiler intermediate representation, or used
libmpx0/copyright:for producing a compiler intermediate representation.
libmpx0/copyright:
libmpx0/copyright:The "Compilation Process" transforms code entirely represented in
libmpx0/copyright:non-intermediate languages designed for human-written code, and/or in
libmpx0/copyright:Java Virtual Machine byte code, into Target Code. Thus, for example,
libmpx0/copyright:use of source code generators and preprocessors need not be considered
libmpx0/copyright:part of the Compilation Process, since the Compilation Process can be
libmpx0/copyright:understood as starting with the output of the generators or
libmpx0/copyright:preprocessors.
libmpx0/copyright:
libmpx0/copyright:A Compilation Process is "Eligible" if it is done using GCC, alone or
libmpx0/copyright:with other GPL-compatible software, or if it is done without using any
libmpx0/copyright:work based on GCC. For example, using non-GPL-compatible Software to
libmpx0/copyright:optimize any GCC intermediate representations would not qualify as an
libmpx0/copyright:Eligible Compilation Process.
libmpx0/copyright:
libmpx0/copyright:1. Grant of Additional Permission.
libmpx0/copyright:
libmpx0/copyright:You have permission to propagate a work of Target Code formed by
libmpx0/copyright:combining the Runtime Library with Independent Modules, even if such
libmpx0/copyright:propagation would otherwise violate the terms of GPLv3, provided that
libmpx0/copyright:all Target Code was generated by Eligible Compilation Processes. You
libmpx0/copyright:may then convey such a combination under terms of your choice,
libmpx0/copyright:consistent with the licensing of the Independent Modules.
libmpx0/copyright:
libmpx0/copyright:2. No Weakening of GCC Copyleft.
libmpx0/copyright:
libmpx0/copyright:The availability of this Exception does not imply any general
libmpx0/copyright:presumption that third-party software is unaffected by the copyleft
libmpx0/copyright:requirements of the license of GCC.

lbspr4/copyright:1. Definitions
lbspr4/copyright:--------------
lbspr4/copyright:
lbspr4/copyright:1.1. "Contributor"
lbspr4/copyright: means each individual or legal entity that creates, contributes to
lbspr4/copyright: the creation of, or owns Covered Software.
lbspr4/copyright:
lbspr4/copyright:1.2. "Contributor Version"
From Ubuntu 16.04 LTS

libnspr4/copyright: means the combination of the Contributions of others (if any) used
libnspr4/copyright: by a Contributor and that particular Contributor's Contribution.
libnspr4/copyright:
libnspr4/copyright:1.3. "Contribution"
libnspr4/copyright: means Covered Software of a particular Contributor.
libnspr4/copyright:
libnspr4/copyright:1.4. "Covered Software"
libnspr4/copyright: means Source Code Form to which the initial Contributor has attached
libnspr4/copyright: the notice in Exhibit A, the Executable Form of such Source Code
libnspr4/copyright: Form, and Modifications of such Source Code Form, in each case
libnspr4/copyright: including portions thereof.
libnspr4/copyright:
libnspr4/copyright:1.5. "Incompatible With Secondary Licenses"
libnspr4/copyright: means
libnspr4/copyright: (a) that the initial Contributor has attached the notice described
libnspr4/copyright: in Exhibit B to the Covered Software; or
libnspr4/copyright:
libnspr4/copyright: (b) that the Covered Software was made available under the terms of
libnspr4/copyright: version 1.1 or earlier of the License, but not also under the
libnspr4/copyright: terms of a Secondary License.
libnspr4/copyright:
libnspr4/copyright:1.6. "Executable Form"
libnspr4/copyright: means any form of the work other than Source Code Form.
libnspr4/copyright:
libnspr4/copyright:1.7. "Larger Work"
libnspr4/copyright: means a work that combines Covered Software with other material, in
libnspr4/copyright: a separate file or files, that is not Covered Software.
libnspr4/copyright:
libnspr4/copyright:1.8. "License"
libnspr4/copyright: means this document.
libnspr4/copyright:
libnspr4/copyright:1.9. "Licensable"
libnspr4/copyright: means having the right to grant, to the maximum extent possible,
libnspr4/copyright: whether at the time of the initial grant or subsequently, any and
libnspr4/copyright: all of the rights conveyed by this License.
libnspr4/copyright:
libnspr4/copyright:1.10. "Modifications"
libnspr4/copyright: means any of the following:
libnspr4/copyright:
libnspr4/copyright: (a) any file in Source Code Form that results from an addition to,
libnspr4/copyright: deletion from, or modification of the contents of Covered
libnspr4/copyright: Software; or
libnspr4/copyright:
libnspr4/copyright: (b) any new file in Source Code Form that contains any Covered
1.11. "Patent Claims" of a Contributor

means any patent claim(s), including without limitation, method, process, and apparatus claims, in any patent Licensable by such Contributor that would be infringed, but for the grant of the License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

1.12. "Secondary License"

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those licenses.

1.13. "Source Code Form"

means the form of the work preferred for making modifications.

1.14. "You" (or "Your")

means an individual or a legal entity exercising rights under this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants and Conditions

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and

(b) under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its

libnspr4/copyright: Contributions or its Contributor Version.
libnspr4/copyright:
libnspr4/copyright:2.2. Effective Date
libnspr4/copyright:
libnspr4/copyright: The licenses granted in this Section 2 are the only rights granted under
libnspr4/copyright: this License. No additional rights or licenses will be implied from the
libnspr4/copyright: distribution or licensing of Covered Software under this License.
libnspr4/copyright: Notwithstanding Section 2.1(b) above, no patent license is granted by a
libnspr4/copyright: Contributor:
libnspr4/copyright: (a) for any code that a Contributor has removed from Covered Software;
libnspr4/copyright: or
libnspr4/copyright: (b) for infringements caused by: (i) Your and any other third party's
libnspr4/copyright: modifications of Covered Software, or (ii) the combination of its
libnspr4/copyright: Contributions with other software (except as part of its Contributor
libnspr4/copyright: Version); or
libnspr4/copyright: (c) under Patent Claims infringed by Covered Software in the absence of
libnspr4/copyright: its Contributions.
libnspr4/copyright:
libnspr4/copyright: This License does not grant any rights in the trademarks, service marks,
libnspr4/copyright: or logos of any Contributor (except as may be necessary to comply with
libnspr4/copyright: the notice requirements in Section 3.4).
libnspr4/copyright:
libnspr4/copyright:2.4. Subsequent Licenses
libnspr4/copyright:
libnspr4/copyright: No Contributor makes additional grants as a result of Your choice to
libnspr4/copyright: distribute the Covered Software under a subsequent version of this
libnspr4/copyright: License (see Section 10.2) or under the terms of a Secondary License (if
libnspr4/copyright: permitted under the terms of Section 3.3).
libnspr4/copyright:
libnspr4/copyright:2.5. Representation
libnspr4/copyright:
libnspr4/copyright: Each Contributor represents that the Contributor believes its
libnspr4/copyright: Contributions are its original creation(s) or it has sufficient rights
libnspr4/copyright: to grant the rights to its Contributions conveyed by this License.
libnspr4/copyright:
libnspr4/copyright:2.6. Fair Use
libnspr4/copyright:
libnspr4/copyright:This License is not intended to limit any rights You have under
libnspr4/copyright:applicable copyright doctrines of fair use, fair dealing, or other
libnspr4/copyright:equivalents.
libnspr4/copyright:
libnspr4/copyright:2.7. Conditions
libnspr4/copyright:
libnspr4/copyright:Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted
libnspr4/copyright:in Section 2.1.
libnspr4/copyright:
libnspr4/copyright:3. Responsibilities
libnspr4/copyright:-------------------
libnspr4/copyright:
libnspr4/copyright:3.1. Distribution of Source Form
libnspr4/copyright:
libnspr4/copyright:All distribution of Covered Software in Source Code Form, including any
libnspr4/copyright:Modifications that You create or to which You contribute, must be under
libnspr4/copyright:the terms of this License. You must inform recipients that the Source
libnspr4/copyright:Code Form of the Covered Software is governed by the terms of this
libnspr4/copyright:License, and how they can obtain a copy of this License. You may not
libnspr4/copyright:attempt to alter or restrict the recipients' rights in the Source Code
libnspr4/copyright:Form.
libnspr4/copyright:
libnspr4/copyright:3.2. Distribution of Executable Form
libnspr4/copyright:
libnspr4/copyright:If You distribute Covered Software in Executable Form then:
libnspr4/copyright:
libnspr4/copyright:(a) such Covered Software must also be made available in Source Code
libnspr4/copyright:Form, as described in Section 3.1, and You must inform recipients of
libnspr4/copyright:the Executable Form how they can obtain a copy of such Source Code
libnspr4/copyright:Form by reasonable means in a timely manner, at a charge no more
libnspr4/copyright:than the cost of distribution to the recipient; and
libnspr4/copyright:
libnspr4/copyright:(b) You may distribute such Executable Form under the terms of this
libnspr4/copyright:license for the Executable Form does not attempt to limit or alter
libnspr4/copyright:the recipients' rights in the Source Code Form under this License.
libnspr4/copyright:
libnspr4/copyright:3.3. Distribution of a Larger Work
libnspr4/copyright:
libnspr4/copyright:You may create and distribute a Larger Work under terms of Your choice,
libnspr4/copyright:provided that You also comply with the requirements of this License for
libnspr4/copyright:the Covered Software. If the Larger Work is a combination of Covered
libnspr4/copyright:Software with a work governed by one or more Secondary Licenses, and the
libnspr4/copyright:Covered Software is not Incompatible With Secondary Licenses, this

license:License permits You to additionally distribute such Covered Software
license:under the terms of such Secondary License(s), so that the recipient of
license:the Larger Work may, at their option, further distribute the Covered
license:Software under the terms of either this License or such Secondary
license:License(s).
license:
license:3.4. Notices
license:
license:You may not remove or alter the substance of any license notices
license:(including copyright notices, patent notices, disclaimers of warranty,
license:or limitations of liability) contained within the Source Code Form of
license:the Covered Software, except that You may alter any license notices to
license:the extent required to remedy known factual inaccuracies.
license:
license:3.5. Application of Additional Terms
license:
license:You may choose to offer, and to charge a fee for, warranty, support,
license:indemnity or liability obligations to one or more recipients of Covered
license:Software. However, You may do so only on Your own behalf, and not on
license:behalf of any Contributor. You must make it absolutely clear that any
license:such warranty, support, indemnity, or liability obligation is offered by
license:You alone, and You hereby agree to indemnify every Contributor for any
license:liability incurred by such Contributor as a result of warranty, support,
license:indemnity or liability terms You offer. You may include additional
license:disclaimers of warranty and limitations of liability specific to any
license:jurisdiction.
license:
license:4. Inability to Comply Due to Statute or Regulation
license:---------------------------------------------------
license:
license:If it is impossible for You to comply with any of the terms of this
license:License with respect to some or all of the Covered Software due to
license:statute, judicial order, or regulation then You must: (a) comply with
license:the terms of this License to the maximum extent possible; and (b)
license:describe the limitations and the code they affect. Such description must
license:be placed in a text file included with all distributions of the Covered
license:Software under this License. Except to the extent prohibited by statute
license:or regulation, such description must be sufficiently detailed for a
license:recipient of ordinary skill to be able to understand it.
license:
license:5. Termination
license:--------------
license:
license:5.1. The rights granted under this License will terminate automatically
license:if You fail to comply with any of its terms. However, if You become
From Ubuntu 16.04 LTS

If the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to You by all and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

6. Disclaimer of Warranty

Covered Software is provided under this License on an "as is" basis, without warranty of any kind, either expressed, implied, or statutory, including, without limitation, warranties that the Covered Software is free of defects, merchantable, fit for a particular purpose or non-infringing. The entire risk as to the quality and performance of the Covered Software is with You. Should any Covered Software prove defective in any respect, You (not any Contributor) assume the cost of any necessary servicing, repair, or correction. This disclaimer of warranty constitutes an essential part of this License. No use of any Covered Software is authorized under this License except under this disclaimer.
7. Limitation of Liability

Under no circumstances and under no legal theory, whether tort (including negligence), contract, or otherwise, shall any Contributor, or anyone who distributes Covered Software as permitted above, be liable to You for any direct, indirect, special, incidental, or consequential damages of any character including, without limitation, damages for lost profits, loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses, even if such party shall have been informed of the possibility of such damages. This limitation of liability shall not apply to liability for death or personal injury resulting from such party's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

8. Litigation

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

9. Miscellaneous

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

10. Versions of the License

This page contains the text of the license for the EFA Ubuntu 15.04 LTS Component OSS Licenses - Supplement.
From Ubuntu 16.04 LTS

Mozilla Foundation is the license steward. Except as provided in Section 10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a distinguishing version number.

Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

Distributing Source Code Form that is Incompatible With Secondary Licenses

If You choose to distribute Source Code Form that is Incompatible With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

Exhibit A - Source Code Form License Notice

libnss3-1d/copyright:Note on GPL Compatibility
libnss3-1d/copyright:The MPL 2, section 3.3, permits you to combine NSS with code under the GNU
libnss3-1d/copyright:General Public License (GPL) version 2, or any later version of that
libnss3-1d/copyright:license, to make a Larger Work, and distribute the result under the GPL.
libnss3-1d/copyright:The only condition is that you must also make NSS, and any changes you
libnss3-1d/copyright:have made to it, available to recipients under the terms of the MPL 2 also.
libnss3-1d/copyright:
libnss3-1d/copyright:Anyone who receives the combined code from you does not have to continue
libnss3-1d/copyright:to dual licence in this way, and may, if they wish, distribute under the
libnss3-1d/copyright:terms of either of the two licences - either the MPL alone or the GPL
libnss3-1d/copyright:alone. However, we discourage people from distributing copies of NSS under
libnss3-1d/copyright:the GPL alone, because it means that any improvements they make cannot be
libnss3-1d/copyright:reincorporated into the main version of NSS. There is never a need to do
libnss3-1d/copyright:this for license compatibility reasons.

libnss3-1d/copyright:
libnss3-1d/copyright:1.14. "You" (or "Your")
libnss3-1d/copyright: means an individual or a legal entity exercising rights under this
libnss3-1d/copyright: License. For legal entities, "You" includes any entity that
libnss3-1d/copyright: controls, is controlled by, or is under common control with You. For
libnss3-1d/copyright: purposes of this definition, "control" means (a) the power, direct
libnss3-1d/copyright: or indirect, to cause the direction or management of such entity,
libnss3-1d/copyright: whether by contract or otherwise, or (b) ownership of more than

libnss3-1d/copyright:2. License Grants and Conditions
libnss3-1d/copyright:----------------------------------------
libnss3-1d/copyright:
libnss3-1d/copyright:2.1. Grants
libnss3-1d/copyright:
libnss3-1d/copyright:Each Contributor hereby grants You a world-wide, royalty-free,
libnss3-1d/copyright:non-exclusive license:
libnss3-1d/copyright:
libnss3-1d/copyright: (a) under intellectual property rights (other than patent or trademark)
libnss3-1d/copyright: Licensable by such Contributor to use, reproduce, make available,
libnss3-1d/copyright: modify, display, perform, distribute, and otherwise exploit its
libnss3-1d/copyright: Contributions, either on an unmodified basis, with Modifications, or
libnss3-1d/copyright: as part of a Larger Work; and
libnss3-1d/copyright:
libnss3-1d/copyright: (b) under Patent Claims of such Contributor to make, use, sell, offer
libnss3-1d/copyright: for sale, have made, import, and otherwise transfer either its
libnss3-1d/copyright: Contributions or its Contributor Version.
libnss3-1d/copyright:
libnss3-1d/copyright:2.2. Effective Date
libnss3-1d/copyright:
libnss3-1d/copyright: The licenses granted in Section 2.1 with respect to any Contribution
libnss3-1d/copyright: become effective for each Contribution on the date the Contributor first
libnss3-1d/copyright:distributes such Contribution.
libnss3-1d/copyright:
From Ubuntu 16.04 LTS

libnss3-1d/copyright:2.3. Limitations on Grant Scope
libnss3-1d/copyright:The licenses granted in this Section 2 are the only rights granted under
libnss3-1d/copyright:this License. No additional rights or licenses will be implied from the
libnss3-1d/copyright:distribution or licensing of Covered Software under this License.
libnss3-1d/copyright:Notwithstanding Section 2.1(b) above, no patent license is granted by a
libnss3-1d/copyright:Contributor:
libnss3-1d/copyright:(a) for any code that a Contributor has removed from Covered Software;
libnss3-1d/copyright: or
libnss3-1d/copyright:(b) for infringements caused by: (i) Your and any other third party's
libnss3-1d/copyright: modifications of Covered Software, or (ii) the combination of its
libnss3-1d/copyright: Contributions with other software (except as part of its Contributor
libnss3-1d/copyright: Version); or
libnss3-1d/copyright:
libnss3-1d/copyright:(c) under Patent Claims infringed by Covered Software in the absence of
libnss3-1d/copyright: its Contributions.

libnss3-1d/copyright:2.4. Subsequent Licenses
libnss3-1d/copyright:No Contributor makes additional grants as a result of Your choice to
libnss3-1d/copyright:distribute the Covered Software under a subsequent version of this
libnss3-1d/copyright:License (see Section 10.2) or under the terms of a Secondary License (if
libnss3-1d/copyright:permitted under the terms of Section 3.3).

libnss3-1d/copyright:2.5. Representation
libnss3-1d/copyright:Each Contributor represents that the Contributor believes its
libnss3-1d/copyright:Contributions are its original creation(s) or it has sufficient rights
libnss3-1d/copyright:to grant the rights to its Contributions conveyed by this License.

libnss3-1d/copyright:2.6. Fair Use
libnss3-1d/copyright:This License is not intended to limit any rights You have under
libnss3-1d/copyright:applicable copyright doctrines of fair use, fair dealing, or other
libnss3-1d/copyright:equivalents.

libnss3-1d/copyright:2.7. Conditions
libnss3-1d/copyright:Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted
libnss3-1d/copyright:From Ubuntu 16.04 LTS
libnss3-1d/copyright:
libnss3-1d/copyright:libnss3-1d/copyright:3. Responsibilities
libnss3-1d/copyright:-------------------
libnss3-1d/copyright:
libnss3-1d/copyright:3.1. Distribution of Source Form
libnss3-1d/copyright:
libnss3-1d/copyright:All distribution of Covered Software in Source Code Form, including any
libnss3-1d/copyright:Modifications that You create or to which You contribute, must be under
libnss3-1d/copyright:the terms of this License. You must inform recipients that the Source
libnss3-1d/copyright:Code Form of the Covered Software is governed by the terms of this
libnss3-1d/copyright:License, and how they can obtain a copy of this License. You may not
libnss3-1d/copyright:attempt to alter or restrict the recipients' rights in the Source Code
libnss3-1d/copyright:Form.
libnss3-1d/copyright:
libnss3-1d/copyright:3.2. Distribution of Executable Form
libnss3-1d/copyright:
libnss3-1d/copyright:If You distribute Covered Software in Executable Form then:
libnss3-1d/copyright:
libnss3-1d/copyright:(a) such Covered Software must also be made available in Source Code
libnss3-1d/copyright: Form, as described in Section 3.1, and You must inform recipients of
libnss3-1d/copyright: the Executable Form how they can obtain a copy of such Source Code
libnss3-1d/copyright: Form by reasonable means in a timely manner, at a charge no more
libnss3-1d/copyright: than the cost of distribution to the recipient; and
libnss3-1d/copyright:
libnss3-1d/copyright:(b) You may distribute such Executable Form under the terms of this
libnss3-1d/copyright: License, or sublicense it under different terms, provided that the
libnss3-1d/copyright: license for the Executable Form does not attempt to limit or alter
libnss3-1d/copyright: the recipients' rights in the Source Code Form under this License.
libnss3-1d/copyright:
libnss3-1d/copyright:3.3. Distribution of a Larger Work
libnss3-1d/copyright:
libnss3-1d/copyright:You may create and distribute a Larger Work under terms of Your choice,
libnss3-1d/copyright: provided that You also comply with the requirements of this License for
libnss3-1d/copyright: the Covered Software. If the Larger Work is a combination of Covered
libnss3-1d/copyright:Software with a work governed by one or more Secondary Licenses, and the
libnss3-1d/copyright:Covered Software is not Incompatible With Secondary Licenses, this
libnss3-1d/copyright:License permits You to additionally distribute such Covered Software
libnss3-1d/copyright:under the terms of such Secondary License(s), so that the recipient of
libnss3-1d/copyright:the Larger Work may, at their option, further distribute the Covered
libnss3-1d/copyright:Software under the terms of either this License or such Secondary
libnss3-1d/copyright:License(s).

libnss3-1d/copyright:3.4. Notices
libnss3-1d/copyright:
From Ubuntu 16.04 LTS

libnss3-1d/copyright:You may not remove or alter the substance of any license notices
libnss3-1d/copyright:(including copyright notices, patent notices, disclaimers of warranty,
libnss3-1d/copyright:or limitations of liability) contained within the Source Code Form of
libnss3-1d/copyright:the Covered Software, except that You may alter any license notices to
libnss3-1d/copyright:the extent required to remedy known factual inaccuracies.
libnss3-1d/copyright:
libnss3-1d/copyright:3.5. Application of Additional Terms
libnss3-1d/copyright:
libnss3-1d/copyright:You may choose to offer, and to charge a fee for, warranty, support,
libnss3-1d/copyright:indemnity or liability obligations to one or more recipients of Covered
libnss3-1d/copyright:Software. However, You may do so only on Your own behalf, and not on
libnss3-1d/copyright:behalf of any Contributor. You must make it absolutely clear that any
libnss3-1d/copyright:such warranty, support, indemnity, or liability obligation is offered by
libnss3-1d/copyright:You alone, and You hereby agree to indemnify every Contributor for any
libnss3-1d/copyright:liability incurred by such Contributor as a result of warranty, support,
libnss3-1d/copyright:indemnity or liability terms You offer. You may include additional
libnss3-1d/copyright:disclaimers of warranty and limitations of liability specific to any
libnss3-1d/copyright:jurisdiction.
libnss3-1d/copyright:
libnss3-1d/copyright:4. Inability to Comply Due to Statute or Regulation
libnss3-1d/copyright:-------------------------------------------
libnss3-1d/copyright:
libnss3-1d/copyright:If it is impossible for You to comply with any of the terms of this
libnss3-1d/copyright:License with respect to some or all of the Covered Software due to
libnss3-1d/copyright:statute, judicial order, or regulation then You must: (a) comply with
libnss3-1d/copyright:the terms of this License to the maximum extent possible; and (b)
libnss3-1d/copyright:describe the limitations and the code they affect. Such description must
libnss3-1d/copyright:be placed in a text file included with all distributions of the Covered
libnss3-1d/copyright:Software under this License. Except to the extent prohibited by statute
libnss3-1d/copyright:or regulation, such description must be sufficiently detailed for a
libnss3-1d/copyright:recipient of ordinary skill to be able to understand it.
libnss3-1d/copyright:
libnss3-1d/copyright:5. Termination
libnss3-1d/copyright:---------
libnss3-1d/copyright:
libnss3-1d/copyright:5.1. The rights granted under this License will terminate automatically
libnss3-1d/copyright:if You fail to comply with any of its terms. However, if You become
libnss3-1d/copyright:compliant, then the rights granted under this License from a particular
libnss3-1d/copyright:Contributor are reinstated (a) provisionally, unless and until such
libnss3-1d/copyright:Contributor explicitly and finally terminates Your grants, and (b) on an
libnss3-1d/copyright:ongoing basis, if such Contributor fails to notify You of the
libnss3-1d/copyright:non-compliance by some reasonable means prior to 60 days after You have
libnss3-1d/copyright:come back into compliance. Moreover, Your grants from a particular
libnss3-1d/copyright:Contributor are reinstated on an ongoing basis if such Contributor
libnss3-1d/copyright:notifies You of the non-compliance by some reasonable means, this is the

libnss3-1d/copyright:from such Contributor, and You become compliant prior to 30 days after

libnss3-1d/copyright:Your receipt of the notice.

libnss3-1d/copyright:

libnss3-1d/copyright:5.2. If You initiate litigation against any entity by asserting a patent

libnss3-1d/copyright:infringement claim (excluding declaratory judgment actions,

libnss3-1d/copyright:counter-claims, and cross-claims) alleging that a Contributor Version

libnss3-1d/copyright:directly or indirectly infringes any patent, then the rights granted to

libnss3-1d/copyright:You by any and all Contributors for the Covered Software under Section

libnss3-1d/copyright:2.1 of this License shall terminate.

Anyone who receives the combined code from you does not have to continue to dual licence in this way, and may, if they wish, distribute under the terms of either of the two licences - either the MPL alone or the GPL. However, we discourage people from distributing copies of NSS under the GPL alone, because it means that any improvements they make cannot be reincorporated into the main version of NSS. There is never a need to do this for license compatibility reasons.

Note on LGPL Compatibility

The above also applies to combining MPLed code in a single library with code under the GNU Lesser General Public License (LGPL) version 2.1, or any later version of that license. If the LGPLed code and the MPLed code are not in the same library, then the copyleft coverage of the two licences does not overlap, so no issues arise.

Mozilla Public License Version 2.0

1. Definitions

1.1. "Contributor" means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

1.2. "Contributor Version" means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor's Contribution.

1.3. "Contribution" means Covered Software of a particular Contributor.

1.4. "Covered Software" means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code, Form, and Modifications of such Source Code Form, in each case including portions thereof.

1.5. "Incompatible With Secondary Licenses" means (a) that the initial Contributor has attached the notice described
From Ubuntu 16.04 LTS

libnss3/copyright: in Exhibit B to the Covered Software; or
libnss3/copyright:
libnss3/copyright: (b) that the Covered Software was made available under the terms of
libnss3/copyright: version 1.1 or earlier of the License, but not also under the
libnss3/copyright: terms of a Secondary License.
libnss3/copyright:
libnss3/copyright: 1.6. "Executable Form"
libnss3/copyright: means any form of the work other than Source Code Form.
libnss3/copyright:
libnss3/copyright: 1.7. "Larger Work"
libnss3/copyright: means a work that combines Covered Software with other material, in
libnss3/copyright: a separate file or files, that is not Covered Software.
libnss3/copyright:
libnss3/copyright: 1.8. "License"
libnss3/copyright: means this document.
libnss3/copyright:
libnss3/copyright: 1.9. "Licensable"
libnss3/copyright: means having the right to grant, to the maximum extent possible,
libnss3/copyright: whether at the time of the initial grant or subsequently, any and
libnss3/copyright: all of the rights conveyed by this License.
libnss3/copyright:
libnss3/copyright: 1.10. "Modifications"
libnss3/copyright: means any of the following:
libnss3/copyright:
libnss3/copyright: (a) any file in Source Code Form that results from an addition to,
libnss3/copyright: deletion from, or modification of the contents of Covered
libnss3/copyright: Software; or
libnss3/copyright:
libnss3/copyright: (b) any new file in Source Code Form that contains any Covered
libnss3/copyright: Software.
libnss3/copyright:
libnss3/copyright: 1.11. "Patent Claims" of a Contributor
libnss3/copyright: means any patent claim(s), including without limitation, method,
libnss3/copyright: process, and apparatus claims, in any patent Licensable by such
libnss3/copyright: Contributor that would be infringed, but for the grant of the
libnss3/copyright: License, by the making, using, selling, offering for sale, having
libnss3/copyright: made, import, or transfer of either its Contributions or its
libnss3/copyright: Contributor Version.
libnss3/copyright:
libnss3/copyright: 1.12. "Secondary License"
libnss3/copyright: means either the GNU General Public License, Version 2.0, the GNU
libnss3/copyright: Lesser General Public License, Version 2.1, the GNU Affero General
libnss3/copyright: Public License, Version 3.0, or any later versions of those
libnss3/copyright: licenses.
From Ubuntu 16.04 LTS

libnss3/copyright:1.13. "Source Code Form"
libnss3/copyright: means the form of the work preferred for making modifications.
libnss3/copyright:
libnss3/copyright:1.14. "You" (or "Your")
libnss3/copyright: means an individual or a legal entity exercising rights under this
libnss3/copyright: License. For legal entities, "You" includes any entity that
libnss3/copyright: controls, is controlled by, or is under common control with You. For
libnss3/copyright: purposes of this definition, "control" means (a) the power, direct
libnss3/copyright: or indirect, to cause the direction or management of such entity,
libnss3/copyright: whether by contract or otherwise, or (b) ownership of more than
libnss3/copyright: fifty percent (50%) of the outstanding shares or beneficial
libnss3/copyright: ownership of such entity.

libnss3/copyright:2. License Grants and Conditions

libnss3/copyright:--------------------------------

libnss3/copyright:2.1. Grants

libnss3/copyright:Each Contributor hereby grants You a world-wide, royalty-free,
libnss3/copyright:non-exclusive license:
libnss3/copyright:
libnss3/copyright:(a) under intellectual property rights (other than patent or trademark)
libnss3/copyright: Licensable by such Contributor to use, reproduce, make available,
libnss3/copyright: modify, display, perform, distribute, and otherwise exploit its
libnss3/copyright: Contributions, either on an unmodified basis, with Modifications, or
libnss3/copyright: as part of a Larger Work; and
libnss3/copyright:
libnss3/copyright:(b) under Patent Claims of such Contributor to make, use, sell, offer
libnss3/copyright: for sale, have made, import, and otherwise transfer either its
libnss3/copyright: Contributions or its Contributor Version.
libnss3/copyright:
libnss3/copyright:2.2. Effective Date

libnss3/copyright:The licenses granted in Section 2.1 with respect to any Contribution
libnss3/copyright:become effective for each Contribution on the date the Contributor first
libnss3/copyright:distributes such Contribution.
libnss3/copyright:
libnss3/copyright:2.3. Limitations on Grant Scope

libnss3/copyright:The licenses granted in this Section 2 are the only rights granted under
libnss3/copyright:this License. No additional rights or licenses will be implied from the
libnss3/copyright:distribution or licensing of Covered Software under this License.
libnss3/copyright:Notwithstanding Section 2.1(b) above, no patent license is granted by a
libnss3/copyright:Contributor:
From Ubuntu 16.04 LTS

libnss3/copyright:(a) for any code that a Contributor has removed from Covered Software;
libnss3/copyright:    or
libnss3/copyright:
libnss3/copyright:(b) for infringements caused by: (i) Your and any other third party's
libnss3/copyright:    modifications of Covered Software, or (ii) the combination of its
libnss3/copyright:    Contributions with other software (except as part of its Contributor
libnss3/copyright:    Version); or
libnss3/copyright:
libnss3/copyright:(c) under Patent Claims infringed by Covered Software in the absence of
libnss3/copyright:    its Contributions.
libnss3/copyright:
libnss3/copyright:This License does not grant any rights in the trademarks, service marks,
libnss3/copyright:or logos of any Contributor (except as may be necessary to comply with
libnss3/copyright:the notice requirements in Section 3.4).
libnss3/copyright:
libnss3/copyright:2.4. Subsequent Licenses
libnss3/copyright:
libnss3/copyright:No Contributor makes additional grants as a result of Your choice to
libnss3/copyright:distribute the Covered Software under a subsequent version of this
libnss3/copyright:License (see Section 10.2) or under the terms of a Secondary License (if
libnss3/copyright:permitted under the terms of Section 3.3).
libnss3/copyright:
libnss3/copyright:2.5. Representation
libnss3/copyright:
libnss3/copyright:Each Contributor represents that the Contributor believes its
libnss3/copyright:Contributions are its original creation(s) or it has sufficient rights
libnss3/copyright:to grant the rights to its Contributions conveyed by this License.
libnss3/copyright:
libnss3/copyright:2.6. Fair Use
libnss3/copyright:
libnss3/copyright:This License is not intended to limit any rights You have under
libnss3/copyright:applicable copyright doctrines of fair use, fair dealing, or other
libnss3/copyright:equivalents.
libnss3/copyright:
libnss3/copyright:2.7. Conditions
libnss3/copyright:
libnss3/copyright:Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted
libnss3/copyright:in Section 2.1.
libnss3/copyright:
libnss3/copyright:3. Responsibilities
libnss3/copyright:-------------------
libnss3/copyright:
libnss3/copyright:3.1. Distribution of Source Form
libnss3/copyright:
libnss3/copyright:All distribution of Covered Software in Source Code Form, including any
From Ubuntu 16.04 LTS

libnss3/copyright: Modifications that You create or to which You contribute, must be under
libnss3/copyright: the terms of this License. You must inform recipients that the Source
libnss3/copyright: Code Form of the Covered Software is governed by the terms of this
libnss3/copyright: License, and how they can obtain a copy of this License. You may not
libnss3/copyright: attempt to alter or restrict the recipients' rights in the Source Code
libnss3/copyright: Form.

libnss3/copyright:

libnss3/copyright: 3.2. Distribution of Executable Form

libnss3/copyright: If You distribute Covered Software in Executable Form then:

libnss3/copyright: (a) such Covered Software must also be made available in Source Code
libnss3/copyright: Form, as described in Section 3.1, and You must inform recipients of
libnss3/copyright: the Executable Form how they can obtain a copy of such Source Code
libnss3/copyright: Form by reasonable means in a timely manner, at a charge no more
libnss3/copyright: than the cost of distribution to the recipient; and

libnss3/copyright: (b) You may distribute such Executable Form under the terms of this
libnss3/copyright: License, or sublicense it under different terms, provided that the
libnss3/copyright: license for the Executable Form does not attempt to limit or alter
libnss3/copyright: the recipients' rights in the Source Code Form under this License.

libnss3/copyright:

libnss3/copyright: 3.3. Distribution of a Larger Work

libnss3/copyright: You may create and distribute a Larger Work under terms of Your choice,
libnss3/copyright: provided that You also comply with the requirements of this License for
libnss3/copyright: the Covered Software. If the Larger Work is a combination of Covered
libnss3/copyright: Software with a work governed by one or more Secondary Licenses, and the
libnss3/copyright: Covered Software is not Incompatible With Secondary Licenses, this
libnss3/copyright: License permits You to additionally distribute such Covered Software
libnss3/copyright: under the terms of such Secondary License(s), so that the recipient of
libnss3/copyright: the Larger Work may, at their option, further distribute the Covered
libnss3/copyright: Software under the terms of either this License or such Secondary
libnss3/copyright: License(s).

libnss3/copyright:

libnss3/copyright: 3.4. Notices

libnss3/copyright: You may not remove or alter the substance of any license notices
libnss3/copyright: (including copyright notices, patent notices, disclaimers of warranty,
libnss3/copyright: or limitations of liability) contained within the Source Code Form of
libnss3/copyright: the Covered Software, except that You may alter any license notices to
libnss3/copyright: the extent required to remedy known factual inaccuracies.

libnss3/copyright:

libnss3/copyright: 3.5. Application of Additional Terms

From Ubuntu 16.04 LTS

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any jurisdiction.

4. Inability to Comply Due to Statute or Regulation

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Termination

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to

libnss3/copyright: 6. Disclaimer of Warranty

libnss3/copyright: 7. Limitation of Liability

libnss3/copyright: Under no circumstances and under no legal theory, whether tort (including negligence), contract, or otherwise, shall any Contributor, or anyone who distributes Covered Software as permitted above, be liable to You for any direct, indirect, special, incidental, or consequential damages of any character including, without limitation, damages for lost profits, goodwill, work stoppage, computer failure or malfunction, or any other damages resulting from use of Covered Software, even if such party shall have been informed of the possibility of such damages. This limitation of liability shall not apply to liability for death or personal injury resulting from such party’s negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of liability.

libnss3/copyright:* incidental or consequential damages, so this exclusion and limitation may not apply to You.*

libnss3/copyright:8. Litigation
libnss3/copyright:-------------
libnss3/copyright:
libnss3/copyright:Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions.
libnss3/copyright:Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

libnss3/copyright:9. Miscellaneous
libnss3/copyright:------------
libnss3/copyright:
libnss3/copyright:This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

libnss3-nssdb/copyright:Note on GPL Compatibility
libnss3-nssdb/copyright:-----------------------------
libnss3-nssdb/copyright:
libnss3-nssdb/copyright:The MPL 2, section 3.3, permits you to combine NSS with code under the GNU
libnss3-nssdb/copyright:General Public License (GPL) version 2, or any later version of that
libnss3-nssdb/copyright:license, to make a Larger Work, and distribute the result under the GPL.
libnss3-nssdb/copyright:The only condition is that you must also make NSS, and any changes you
libnss3-nssdb/copyright:have made to it, available to recipients under the terms of the MPL 2 also.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright:Anyone who receives the combined code from you does not have to continue
libnss3-nssdb/copyright:to dual licence in this way, and may, if they wish, distribute under the
libnss3-nssdb/copyright:terms of either of the two licences - either the MPL alone or the GPL
libnss3-nssdb/copyright:alone. However, we discourage people from distributing copies of NSS under
libnss3-nssdb/copyright:the GPL alone, because it means that any improvements they make cannot be
libnss3-nssdb/copyright:reincorporated into the main version of NSS. There is never a need to do
libnss3-nssdb/copyright:for license compatibility reasons.
The above also applies to combining MP Led code in a single library with code under the GNU Lesser General Public License (LGPL) version 2.1, or any later version of that license. If the LGPLed code and the MP Led code are not in the same library, then the copyleft coverage of the two licences does not overlap, so no issues arise.

Mozilla Public License Version 2.0

1. Definitions

---

1.1. "Contributor" means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

1.2. "Contributor Version" means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor’s Contribution.

1.3. "Contribution" means Covered Software of a particular Contributor.

1.4. "Covered Software" means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case including portions thereof.

1.5. "Incompatible With Secondary Licenses" means

(a) that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or

(b) that the Covered Software was made available under the terms of version 1.1 or earlier of the License, but not also under the terms of a Secondary License.

1.6. "Executable Form" means any form of the work other than Source Code Form.
From Ubuntu 16.04 LTS

libnss3-nssdb/copyright:
libnss3-nssdb/copyright: 1.7. "Larger Work"
libnss3-nssdb/copyright: means a work that combines Covered Software with other material, in
libnss3-nssdb/copyright: a separate file or files, that is not Covered Software.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright: 1.8. "License"
libnss3-nssdb/copyright: means this document.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright: 1.9. "Licensable"
libnss3-nssdb/copyright: means having the right to grant, to the maximum extent possible,
libnss3-nssdb/copyright: whether at the time of the initial grant or subsequently, any and
libnss3-nssdb/copyright: all of the rights conveyed by this License.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright: 1.10. "Modifications"
libnss3-nssdb/copyright: means any of the following:
libnss3-nssdb/copyright:
libnss3-nssdb/copyright: (a) any file in Source Code Form that results from an addition to,
libnss3-nssdb/copyright: deletion from, or modification of the contents of Covered
libnss3-nssdb/copyright: Software; or
libnss3-nssdb/copyright:
libnss3-nssdb/copyright: (b) any new file in Source Code Form that contains any Covered
libnss3-nssdb/copyright: Software.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright: 1.11. "Patent Claims" of a Contributor
libnss3-nssdb/copyright: means any patent claim(s), including without limitation, method,
libnss3-nssdb/copyright: process, and apparatus claims, in any patent Licensable by such
libnss3-nssdb/copyright: Contributor that would be infringed, but for the grant of the
libnss3-nssdb/copyright: License, by the making, using, selling, offering for sale, having
libnss3-nssdb/copyright: made, import, or transfer of either its Contributions or its
libnss3-nssdb/copyright: Contributor Version.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright: 1.12. "Secondary License"
libnss3-nssdb/copyright: means either the GNU General Public License, Version 2.0, the GNU
libnss3-nssdb/copyright: Lesser General Public License, Version 2.1, the GNU Affero General
libnss3-nssdb/copyright: Public License, Version 3.0, or any later versions of those
libnss3-nssdb/copyright: licenses.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright: 1.13. "Source Code Form"
libnss3-nssdb/copyright: means the form of the work preferred for making modifications.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright: 1.14. "You" (or "Your")
libnss3-nssdb/copyright: means an individual or a legal entity exercising rights under this
libnss3-nssdb/copyright: License. For legal entities, "You" includes any entity that
libnss3-nssdb/copyright: controls, is controlled by, or is under common control with You. For
libnss3-nssdb/copyright: purposes of this definition, "control" means (a) the power, direct
2. License Grants and Conditions

2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and

(b) under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its Contributions or its Contributor Version.

2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License. Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

(a) for any code that a Contributor has removed from Covered Software; or

(b) for infringements caused by: (i) Your and any other third party's modifications of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or

libnss3-nssdb/copyright:(c) under Patent Claims infringed by Covered Software in the absence of its Contributions.

libnss3-nssdb/copyright:This License does not grant any rights in the trademarks, service marks, or logos of any Contributor (except as may be necessary to comply with the notice requirements in Section 3.4).

libnss3-nssdb/copyright:2.4. Subsequent Licenses

libnss3-nssdb/copyright:No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

libnss3-nssdb/copyright:2.5. Representation

libnss3-nssdb/copyright:Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

libnss3-nssdb/copyright:2.6. Fair Use

libnss3-nssdb/copyright:This License is not intended to limit any rights You have under applicable copyright doctrines of fair use, fair dealing, or other equivalents.

libnss3-nssdb/copyright:2.7. Conditions

libnss3-nssdb/copyright:Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

libnss3-nssdb/copyright:3. Responsibilities

libnss3-nssdb/copyright:3.1. Distribution of Source Form

libnss3-nssdb/copyright:All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients' rights in the Source Code Form.

libnss3-nssdb/copyright:3.2. Distribution of Executable Form
If You distribute Covered Software in Executable Form then:

(a) such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of the Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost of distribution to the recipient; and

(b) You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients' rights in the Source Code Form under this License.

3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered Software under the terms of either this License or such Secondary License(s).

3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional

libnss3-nssdb/copyright:disclaimers of warranty and limitations of liability specific to any
libnss3-nssdb/copyright:jurisdiction.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright:4. Inability to Comply Due to Statute or Regulation
libnss3-nssdb/copyright:---------------------------------------------------
libnss3-nssdb/copyright:
libnss3-nssdb/copyright:If it is impossible for You to comply with any of the terms of this
libnss3-nssdb/copyright:License with respect to some or all of the Covered Software due to
libnss3-nssdb/copyright:statute, judicial order, or regulation then You must: (a) comply with
libnss3-nssdb/copyright:the terms of this License to the maximum extent possible; and (b)
libnss3-nssdb/copyright:describe the limitations and the code they affect. Such description must
libnss3-nssdb/copyright:be placed in a text file included with all distributions of the Covered
libnss3-nssdb/copyright:Software under this License. Except to the extent prohibited by statute
libnss3-nssdb/copyright:or regulation, such description must be sufficiently detailed for a
libnss3-nssdb/copyright:recipient of ordinary skill to be able to understand it.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright:5. Termination
libnss3-nssdb/copyright:--------------
libnss3-nssdb/copyright:
libnss3-nssdb/copyright:5.1. The rights granted under this License will terminate automatically
libnss3-nssdb/copyright:if You fail to comply with any of its terms. However, if You become
libnss3-nssdb/copyright:compliant, then the rights granted under this License from a particular
libnss3-nssdb/copyright:Contributor are reinstated (a) provisionally, unless and until such
libnss3-nssdb/copyright:Contributor explicitly and finally terminates Your grants, and (b) on an
libnss3-nssdb/copyright:ongoing basis, if such Contributor fails to notify You of the
libnss3-nssdb/copyright:non-compliance by some reasonable means prior to 60 days after You have
libnss3-nssdb/copyright:come back into compliance. Moreover, Your grants from a particular
libnss3-nssdb/copyright:Contributor are reinstated on an ongoing basis if such Contributor
libnss3-nssdb/copyright:notifies You of the non-compliance by some reasonable means, this is the
libnss3-nssdb/copyright:first time You have received notice of non-compliance with this License
libnss3-nssdb/copyright:from such Contributor, and You become compliant prior to 30 days after
libnss3-nssdb/copyright:Your receipt of the notice.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright:5.2. If You initiate litigation against any entity by asserting a patent
libnss3-nssdb/copyright:infringement claim (excluding declaratory judgment actions,
libnss3-nssdb/copyright:counter-claims, and cross-claims) alleging that a Contributor Version
libnss3-nssdb/copyright:directly or indirectly infringes any patent, then the rights granted to
libnss3-nssdb/copyright:You by any and all Contributors for the Covered Software under Section
libnss3-nssdb/copyright:2.1 of this License shall terminate.
libnss3-nssdb/copyright:
libnss3-nssdb/copyright:5.3. In the event of termination under Sections 5.1 or 5.2 above, all
libnss3-nssdb/copyright:end user license agreements (excluding distributors and resellers) which
libnss3-nssdb/copyright:have been validly granted by You or Your distributors under this License
libnss3-nssdb/copyright:prior to termination shall survive termination.

6. Disclaimer of Warranty

Covered Software is provided under this License on an "as is" basis, without warranty of any kind, either expressed, implied, or statutory, including, without limitation, warranties that the Covered Software is free of defects, merchantable, fit for a particular purpose or non-infringing. The entire risk as to the quality and performance of the Covered Software is with You. Should any Covered Software prove defective in any respect, You (not any Contributor) assume the cost of any necessary servicing, repair, or correction. This disclaimer of warranty constitutes an essential part of this License. No use of any Covered Software is authorized under this License except under this disclaimer.

7. Limitation of Liability

Under no circumstances and under no legal theory, whether tort (including negligence), contract, or otherwise, shall any Contributor, or anyone who distributes Covered Software as permitted above, be liable to You for any direct, indirect, special, incidental, or consequential damages of any character including, without limitation, damages for lost profits, goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses, even if such party shall have been informed of the possibility of such damages. This limitation of liability shall not apply to liability for death or personal injury resulting from such party's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.
Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party’s ability to bring cross-claims or counter-claims.

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

 Mozilla Foundation is the license steward. Except as provided in Section 10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a distinguishing version number.

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

libopencryptoki0/copyright:
libopencryptoki0/copyright: 1. DEFINITIONS
libopencryptoki0/copyright:
libopencryptoki0/copyright: "Contribution" means:
libopencryptoki0/copyright:
libopencryptoki0/copyright: a) in the case of the initial Contributor, the initial code and documentation
libopencryptoki0/copyright: distributed under this Agreement, and
libopencryptoki0/copyright:
libopencryptoki0/copyright: b) in the case of each subsequent Contributor:
libopencryptoki0/copyright:
libopencryptoki0/copyright: i) changes to the Program, and
libopencryptoki0/copyright:
libopencryptoki0/copyright: ii) additions to the Program;
libopencryptoki0/copyright:
libopencryptoki0/copyright: where such changes and/or additions to the Program originate from and are
libopencryptoki0/copyright: distributed by that particular Contributor. A Contribution 'originates' from a
libopencryptoki0/copyright:Contributor if it was added to the Program by such Contributor itself or anyone
libopencryptoki0/copyright:acting on such Contributor's behalf. Contributions do not include additions to
libopencryptoki0/copyright:the Program which: (i) are separate modules of software distributed in
libopencryptoki0/copyright:conjunction with the Program under their own license agreement, and (ii) are
libopencryptoki0/copyright:not derivative works of the Program.
From Ubuntu 16.04 LTS
libopencryptoki0/copyright: "Contributor" means any person or entity that distributes the Program.
libopencryptoki0/copyright: "Licensed Patents " mean patent claims licensable by a Contributor which are
libopencryptoki0/copyright: necessarily infringed by the use or sale of its Contribution alone or when
libopencryptoki0/copyright: combined with the Program.
libopencryptoki0/copyright: "Program" means the Contributions distributed in accordance with this
libopencryptoki0/copyright: Agreement.
libopencryptoki0/copyright: "Recipient" means anyone who receives the Program under this Agreement,
libopencryptoki0/copyright: including all Contributors.
libopencryptoki0/copyright: 2. GRANT OF RIGHTS
libopencryptoki0/copyright: a) Subject to the terms of this Agreement, each Contributor hereby grants
libopencryptoki0/copyright: Recipient a non-exclusive, worldwide, royalty-free copyright license to
libopencryptoki0/copyright: reproduce, prepare derivative works of, publicly display, publicly perform,
libopencryptoki0/copyright: distribute and sublicense the Contribution of such Contributor, if any, and
libopencryptoki0/copyright: such derivative works, in source code and object code form.
libopencryptoki0/copyright: b) Subject to the terms of this Agreement, each Contributor hereby grants
libopencryptoki0/copyright: Recipient a non-exclusive, worldwide, royalty-free patent license under
libopencryptoki0/copyright: Licensed Patents to make, use, sell, offer to sell, import and otherwise
libopencryptoki0/copyright: transfer the Contribution of such Contributor, if any, in source code and
libopencryptoki0/copyright: object code form. This patent license shall apply to the combination of the
libopencryptoki0/copyright: Contribution and the Program if, at the time the Contribution is added by the
libopencryptoki0/copyright: Contributor, such addition of the Contribution causes such combination to be
libopencryptoki0/copyright: covered by the Licensed Patents. The patent license shall not apply to any
libopencryptoki0/copyright: other combinations which include the Contribution. No hardware per se is
libopencryptoki0/copyright: licensed hereunder.
libopencryptoki0/copyright: c) Recipient understands that although each Contributor grants the licenses to
libopencryptoki0/copyright: its Contributions set forth herein, no assurances are provided by any
libopencryptoki0/copyright: property rights of any other entity. Each Contributor disclaims any liability
libopencryptoki0/copyright: to Recipient for claims brought by any other entity based on infringement of
libopencryptoki0/copyright: intellectual property rights or otherwise. As a condition to exercising the
libopencryptoki0/copyright: rights and licenses granted hereunder, each Recipient hereby assumes sole
libopencryptoki0/copyright: responsibility to secure any other intellectual property rights needed, if any.
libopencryptoki0/copyright: For example, if a third party patent license is required to allow Recipient to
libopencryptoki0/copyright: distribute the Program, it is Recipient’s responsibility to acquire that
libopencryptoki0/copyright: license before distributing the Program.
libopencryptoki0/copyright: d) Each Contributor represents that to its knowledge it has sufficient
From Ubuntu 16.04 LTS

libopencryptoki0/copyright: copyright rights in its Contribution, if any, to grant the copyright license
libopencryptoki0/copyright: set forth in this Agreement.
libopencryptoki0/copyright: 3. REQUIREMENTS
libopencryptoki0/copyright: A Contributor may choose to distribute the Program in object code form under
libopencryptoki0/copyright: its own license agreement, provided that:
libopencryptoki0/copyright: a) it complies with the terms and conditions of this Agreement; and
libopencryptoki0/copyright: b) its license agreement:
libopencryptoki0/copyright: i) effectively disclaims on behalf of all Contributors all warranties and
libopencryptoki0/copyright: conditions, express and implied, including warranties or conditions of title
libopencryptoki0/copyright: and non-infringement, and implied warranties or conditions of merchantability
libopencryptoki0/copyright: and fitness for a particular purpose;
libopencryptoki0/copyright: ii) effectively excludes on behalf of all Contributors all liability for
libopencryptoki0/copyright: damages, including direct, indirect, special, incidental and consequential
libopencryptoki0/copyright: damages, such as lost profits;
libopencryptoki0/copyright: iii) states that any provisions which differ from this Agreement are offered by
libopencryptoki0/copyright: that Contributor alone and not by any other party; and
libopencryptoki0/copyright: iv) states that source code for the Program is available from such Contributor,
libopencryptoki0/copyright: and informs licensees how to obtain it in a reasonable manner on or through a
libopencryptoki0/copyright: medium customarily used for software exchange.
libopencryptoki0/copyright: When the Program is made available in source code form:
libopencryptoki0/copyright: a) it must be made available under this Agreement; and
libopencryptoki0/copyright: b) a copy of this Agreement must be included with each copy of the Program.
libopencryptoki0/copyright: Contributors may not remove or alter any copyright notices contained within the
libopencryptoki0/copyright: Program.
libopencryptoki0/copyright: Each Contributor must identify itself as the originator of its Contribution, if
libopencryptoki0/copyright: any, in a manner that reasonably allows subsequent Recipients to identify the
libopencryptoki0/copyright: originator of the Contribution.
libopencryptoki0/copyright: 4. COMMERCIAL DISTRIBUTION
libopencryptoki0/copyright: Commercial distributors of software may accept certain responsibilities with
libopencryptoki0/copyright: respect to end users, business partners and the like. While this license is
From Ubuntu 16.04 LTS

libopencryptoki0/copyright: intended to facilitate the commercial use of the Program, the Contributor who
libopencryptoki0/copyright: includes the Program in a commercial product offering should do so in a manner
libopencryptoki0/copyright: which does not create potential liability for other Contributors. Therefore, if
libopencryptoki0/copyright: a Contributor includes the Program in a commercial product offering, such
libopencryptoki0/copyright: Contributor ("Commercial Contributor") hereby agrees to defend and indemnify
libopencryptoki0/copyright: every other Contributor ("Indemnified Contributor") against any losses, damages
libopencryptoki0/copyright: and costs (collectively "Losses") arising from claims, lawsuits and other legal
libopencryptoki0/copyright: actions brought by a third party against the Indemnified Contributor to the
libopencryptoki0/copyright: extent caused by the acts or omissions of such Commercial Contributor in
libopencryptoki0/copyright: connection with its distribution of the Program in a commercial product
libopencryptoki0/copyright: offering. The obligations in this section do not apply to any claims or Losses
libopencryptoki0/copyright: relating to any actual or alleged intellectual property infringement. In order
libopencryptoki0/copyright: to qualify, an Indemnified Contributor must: a) promptly notify the Commercial
libopencryptoki0/copyright: Contributor in writing of such claim, and b) allow the Commercial Contributor
libopencryptoki0/copyright: to control, and cooperate with the Commercial Contributor in, the defense and
libopencryptoki0/copyright: any related settlement negotiations. The Indemnified Contributor may
libopencryptoki0/copyright: participate in any such claim at its own expense.

libopencryptoki0/copyright: For example, a Contributor might include the Program in a commercial product
libopencryptoki0/copyright: offering, Product X. That Contributor is then a Commercial Contributor. If that
libopencryptoki0/copyright: Commercial Contributor then makes performance claims, or offers warranties
libopencryptoki0/copyright: related to Product X, those performance claims and warranties are such
libopencryptoki0/copyright: Commercial Contributor’s responsibility alone. Under this section, the
libopencryptoki0/copyright: Commercial Contributor would have to defend claims against the other
libopencryptoki0/copyright: Contributors related to those performance claims and warranties, and if a court
libopencryptoki0/copyright: requires any other Contributor to pay any damages as a result, the Commercial
libopencryptoki0/copyright: Contributor must pay those damages.

libopencryptoki0/copyright: 5. NO WARRANTY

libopencryptoki0/copyright: EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS
libopencryptoki0/copyright: "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER
libopencryptoki0/copyright: IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF
libopencryptoki0/copyright: NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.
libopencryptoki0/copyright: Recipient is solely responsible for determining the appropriateness of using
libopencryptoki0/copyright: and distributing the Program and assumes all risks associated with its exercise
libopencryptoki0/copyright: of rights under this Agreement, including but not limited to the risks and
libopencryptoki0/copyright: costs of program errors, compliance with applicable laws, damage to or loss of
libopencryptoki0/copyright: data, programs or equipment, and unavailability or interruption of operations.

libopencryptoki0/copyright: 6. DISCLAIMER OF LIABILITY

libopencryptoki0/copyright: EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR
libopencryptoki0/copyright: CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT,
libopencryptoki0/copyright: SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT

libopencryptoki0/copyright: PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN
libopencryptoki0/copyright: STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN
libopencryptoki0/copyright: WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF
libopencryptoki0/copyright: GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
libopencryptoki0/copyright: .
libopencryptoki0/copyright: 7. GENERAL
libopencryptoki0/copyright: .
libopencryptoki0/copyright: If any provision of this Agreement is invalid or unenforceable under applicable
libopencryptoki0/copyright: law, it shall not affect the validity or enforceability of the remainder of the
libopencryptoki0/copyright: terms of this Agreement, and without further action by the parties hereto, such
libopencryptoki0/copyright: provision shall be reformed to the minimum extent necessary to make such
libopencryptoki0/copyright: provision valid and enforceable.
libopencryptoki0/copyright: .
libopencryptoki0/copyright: If Recipient institutes patent litigation against a Contributor with respect to
libopencryptoki0/copyright: a patent applicable to software (including a cross-claim or counterclaim in a
libopencryptoki0/copyright: lawsuit), then any patent licenses granted by that Contributor to such
libopencryptoki0/copyright: Recipient under this Agreement shall terminate as of the date such litigation
libopencryptoki0/copyright: is filed. In addition, if Recipient institutes patent litigation against any
libopencryptoki0/copyright: entity (including a cross-claim or counterclaim in a lawsuit) alleging that the
libopencryptoki0/copyright: Program itself (excluding combinations of the Program with other software or
libopencryptoki0/copyright: hardware) infringes such Recipient's patent(s), then such Recipient's rights
libopencryptoki0/copyright: granted under Section 2(b) shall terminate as of the date such litigation is
libopencryptoki0/copyright: filed.
libopencryptoki0/copyright: .
libopencryptoki0/copyright: All Recipient's rights under this Agreement shall terminate if it fails to
libopencryptoki0/copyright: comply with any of the material terms or conditions of this Agreement and does
libopencryptoki0/copyright: not cure such failure in a reasonable period of time after becoming aware of
libopencryptoki0/copyright: such noncompliance. If all Recipient's rights under this Agreement terminate,
libopencryptoki0/copyright: Recipient agrees to cease use and distribution of the Program as soon as
libopencryptoki0/copyright: reasonably practicable. However, Recipient's obligations under this Agreement
libopencryptoki0/copyright: and any licenses granted by Recipient relating to the Program shall continue
libopencryptoki0/copyright: and survive.
libopencryptoki0/copyright: .
libopencryptoki0/copyright: Everyone is permitted to copy and distribute copies of this Agreement, but in
libopencryptoki0/copyright: order to avoid inconsistency the Agreement is copyrighted and may only be
libopencryptoki0/copyright: modified in the following manner. The Agreement Steward reserves the right to
libopencryptoki0/copyright: publish new versions (including revisions) of this Agreement from time to time.
libopencryptoki0/copyright: No one other than the Agreement Steward has the right to modify this Agreement.
libopencryptoki0/copyright: IBM is the initial Agreement Steward. IBM may assign the responsibility to
libopencryptoki0/copyright: serve as the Agreement Steward to a suitable separate entity. Each new version
libopencryptoki0/copyright: of the Agreement will be given a distinguishing version number. The Program
libopencryptoki0/copyright: (including Contributions) may always be distributed subject to the version of
libopencryptoki0/copyright: the Agreement under which it was received. In addition, after a new version of
libopencryptoki0/copyright: the Agreement is published, Contributor may elect to distribute the Program
libopencryptoki0/copyright: (including its Contributions) under the new version. Except as expressly stated
From Ubuntu 16.04 LTS

libopencryptoki0/copyright: in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to
libopencryptoki0/copyright: the intellectual property of any Contributor under this Agreement, whether
libopencryptoki0/copyright: expressly, by implication, estoppel or otherwise. All rights in the Program not
libopencryptoki0/copyright: expressly granted under this Agreement are reserved.

libopencryptoki0/copyright: This Agreement is governed by the laws of the State of New York and the
libopencryptoki0/copyright: intellectual property laws of the United States of America. No party to this
libopencryptoki0/copyright: Agreement will bring a legal action under this Agreement more than one year
libopencryptoki0/copyright: after the cause of action arose. Each party waives its rights to a jury trial
libopencryptoki0/copyright: in any resulting litigation.

libparted2/copyright: The purpose of this License is to make a manual, textbook, or other
From Ubuntu 16.04 LTS

libparted2/copyright: written document "free" in the sense of freedom: to assure everyone
libparted2/copyright: the effective freedom to copy and redistribute it, with or without
libparted2/copyright: modifying it, either commercially or noncommercially. Secondarily,
libparted2/copyright: this License preserves for the author and publisher a way to get
libparted2/copyright: credit for their work, while not being considered responsible for
libparted2/copyright: modifications made by others.
libparted2/copyright:
libparted2/copyright: This License is a kind of "copyleft", which means that derivative
libparted2/copyright: works of the document must themselves be free in the same sense.
libparted2/copyright: It complements the GNU General Public License, which is a copyleft
libparted2/copyright: license designed for free software.
libparted2/copyright:
libparted2/copyright: We have designed this License in order to use it for manuals for
libparted2/copyright: free software, because free software needs free documentation: a
libparted2/copyright: free program should come with manuals providing the same freedoms
libparted2/copyright: that the software does. But this License is not limited to
libparted2/copyright: software manuals; it can be used for any textual work, regardless
libparted2/copyright: of subject matter or whether it is published as a printed book.
libparted2/copyright: We recommend this License principally for works whose purpose is
libparted2/copyright: instruction or reference.
libparted2/copyright:
libparted2/copyright: 1. APPLICABILITY AND DEFINITIONS

libparted2/copyright: This License applies to any manual or other work that contains a
libparted2/copyright: notice placed by the copyright holder saying it can be distributed
libparted2/copyright: under the terms of this License. The "Document", below, refers to
libparted2/copyright: any such manual or work. Any member of the public is a licensee,
libparted2/copyright: and is addressed as "you".

libparted2/copyright: A "Modified Version" of the Document means any work containing the
libparted2/copyright: Document or a portion of it, either copied verbatim, or with
libparted2/copyright: modifications and/or translated into another language.

libparted2/copyright: A "Secondary Section" is a named appendix or a front-matter
section of the Document that deals exclusively with the
relationship of the publishers or authors of the Document to the
Document’s overall subject (or to related matters) and contains
nothing that could fall directly within that overall subject.
(For example, if the Document is in part a textbook of
mathematics, a Secondary Section may not explain any mathematics.)

libparted2/copyright: The relationship could be a matter of historical connection with
the subject or with related matters, or of legal, commercial,
philosophical, ethical or political position regarding them.

libparted2/copyright: The "Invariant Sections" are certain Secondary Sections whose
2. VERBATIM COPYING

You may copy and distribute the Document in any medium, either
commercially or noncommercially, provided that this License, the
copyright notices, and the license notice saying this License
applies to the Document are reproduced in all copies, and that you
add no other conditions whatsoever to those of this License. You
may not use technical measures to obstruct or control the reading
From Ubuntu 16.04 LTS

libparted2/copyright: or further copying of the copies you make or distribute. However,
libparted2/copyright: you may accept compensation in exchange for copies. If you
libparted2/copyright: distribute a large enough number of copies you must also follow
libparted2/copyright: the conditions in section 3.
libparted2/copyright: You may also lend copies, under the same conditions stated above,
libparted2/copyright: and you may publicly display copies.

libparted2/copyright:

3. COPYING IN QUANTITY

libparted2/copyright: If you publish printed copies of the Document numbering more than
libparted2/copyright: 100, and the Document's license notice requires Cover Texts, you
libparted2/copyright: must enclose the copies in covers that carry, clearly and legibly,
libparted2/copyright: all these Cover Texts: Front-Cover Texts on the front cover, and
libparted2/copyright: Back-Cover Texts on the back cover. Both covers must also clearly
libparted2/copyright: and legibly identify you as the publisher of these copies. The
libparted2/copyright: front cover must present the full title with all words of the
libparted2/copyright: title equally prominent and visible. You may add other material
libparted2/copyright: on the covers in addition. Copying with changes limited to the
libparted2/copyright: covers, as long as they preserve the title of the Document and
libparted2/copyright: satisfy these conditions, can be treated as verbatim copying in
libparted2/copyright: other respects.

libparted2/copyright: If the required texts for either cover are too voluminous to fit
libparted2/copyright: legibly, you should put the first ones listed (as many as fit
libparted2/copyright: reasonably) on the actual cover, and continue the rest onto
libparted2/copyright: adjacent pages.

libparted2/copyright: If you publish or distribute Opaque copies of the Document
libparted2/copyright: numbering more than 100, you must either include a
libparted2/copyright: machine-readable Transparent copy along with each Opaque copy, or
libparted2/copyright: state in or with each Opaque copy a publicly-accessible
libparted2/copyright: computer-network location containing a complete Transparent copy
libparted2/copyright: of the Document, free of added material, which the general
libparted2/copyright: network-using public has access to download anonymously at no
libparted2/copyright: charge using public-standard network protocols. If you use the
libparted2/copyright: latter option, you must take reasonably prudent steps, when you
libparted2/copyright: begin distribution of Opaque copies in quantity, to ensure that
libparted2/copyright: this Transparent copy will remain thus accessible at the stated
libparted2/copyright: location until at least one year after the last time you
libparted2/copyright: distribute an Opaque copy (directly or through your agents or
libparted2/copyright: retailers) of that edition to the public.

libparted2/copyright: It is requested, but not required, that you contact the authors of
libparted2/copyright: the Document well before redistributing any large number of
4. MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections 2 and 3 above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

A. Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions (which should, if there were any, be listed in the History section of the Document). You may use the same title as a previous version if the original publisher of that version gives permission.

B. List on the Title Page, as authors, one or more persons or entities responsible for authorship of the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has less than five).

C. State on the Title page the name of the publisher of the Modified Version, as the publisher.

D. Preserve all the copyright notices of the Document.

E. Add an appropriate copyright notice for your modifications adjacent to the other copyright notices.

F. Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below.

G. Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document’s license notice.

H. Include an unaltered copy of this License.
From Ubuntu 16.04 LTS

I. Preserve the section entitled "History", and its title, and add to it an item stating at least the title, year, new authors, and publisher of the Modified Version as given on the Title Page. If there is no section entitled "History" in the Document, create one stating the title, year, authors, and publisher of the Document as given on its Title Page, then add an item describing the Modified Version as stated in the previous sentence.

J. Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions it was based on. These may be placed in the "History" section. You may omit a network location for a work that was published at least four years before the Document itself, or if the original publisher of the version it refers to gives permission.

K. In any section entitled "Acknowledgments" or "Dedications", preserve the section's title, and preserve in the section all the substance and tone of each of the contributor acknowledgments and/or dedications given therein.

L. Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles.

M. Delete any section entitled "Endorsements". Such a section may not be included in the Modified Version.

N. Do not retitle any existing section as "Endorsements" or to conflict in title with any Invariant Section.

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document, you may at your option designate some or all of these sections as invariant. To do this, add their titles to the list of Invariant Sections in the Modified Version's license notice. These titles must be distinct from any other section titles.

You may add a section entitled "Endorsements", provided it contains nothing but endorsements of your Modified Version by various parties--for example, statements of peer review or that the text...
From Ubuntu 16.04 LTS

libparted2/copyright: has been approved by an organization as the authoritative definition of a standard.

libparted2/copyright: You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf of, you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

libparted2/copyright: The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version.

5. COMBINING DOCUMENTS

libparted2/copyright: You may combine the Document with other documents released under this License, under the terms defined in section 4 above for modified versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice.

libparted2/copyright: The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that section if known, or else a unique number. Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.

libparted2/copyright: In the combination, you must combine any sections entitled "History" in the various original documents, forming one section entitled "History"; likewise combine any sections entitled "Acknowledgments", and any sections entitled "Dedications". You must delete all sections entitled "Endorsements."

6. COLLECTIONS OF DOCUMENTS
From Ubuntu 16.04 LTS

libparted2/copyright: You may make a collection consisting of the Document and other
libparted2/copyright: documents released under this License, and replace the individual
libparted2/copyright: copies of this License in the various documents with a single copy
libparted2/copyright: that is included in the collection, provided that you follow the
libparted2/copyright: rules of this License for verbatim copying of each of the
libparted2/copyright: documents in all other respects.
libparted2/copyright:
libparted2/copyright: You may extract a single document from such a collection, and
libparted2/copyright: distribute it individually under this License, provided you insert
libparted2/copyright: a copy of this License into the extracted document, and follow
libparted2/copyright: this License in all other respects regarding verbatim copying of
libparted2/copyright: that document.
libparted2/copyright:
libparted2/copyright: 7. AGGREGATION WITH INDEPENDENT WORKS
libparted2/copyright:
libparted2/copyright: A compilation of the Document or its derivatives with other
libparted2/copyright: separate and independent documents or works, in or on a volume of
libparted2/copyright: a storage or distribution medium, does not as a whole count as a
libparted2/copyright: Modified Version of the Document, provided no compilation
libparted2/copyright: copyright is claimed for the compilation. Such a compilation is
libparted2/copyright: called an "aggregate", and this License does not apply to the
libparted2/copyright: other self-contained works thus compiled with the Document, on
libparted2/copyright: account of their being thus compiled, if they are not themselves
libparted2/copyright: derivative works of the Document.
libparted2/copyright:
libparted2/copyright: If the Cover Text requirement of section 3 is applicable to these
libparted2/copyright: copies of the Document, then if the Document is less than one
libparted2/copyright: quarter of the entire aggregate, the Document's Cover Texts may be
libparted2/copyright: placed on covers that surround only the Document within the
libparted2/copyright: aggregate. Otherwise they must appear on covers around the whole
libparted2/copyright: aggregate.
libparted2/copyright:
libparted2/copyright: 8. TRANSLATION
libparted2/copyright:
libparted2/copyright: Translation is considered a kind of modification, so you may
libparted2/copyright: distribute translations of the Document under the terms of section
libparted2/copyright: 4. Replacing Invariant Sections with translations requires special
libparted2/copyright: permission from their copyright holders, but you may include
libparted2/copyright: translations of some or all Invariant Sections in addition to the
libparted2/copyright: original versions of these Invariant Sections. You may include a
libparted2/copyright: translation of this License provided that you also include the
libparted2/copyright: original English version of this License. In case of a
libparted2/copyright: disagreement between the translation and the original English
libparted2/copyright: version of this License, the original English version will prevail.
libparted2/copyright: 9. TERMINATION
libparted2/copyright:
libparted2/copyright: You may not copy, modify, sublicense, or distribute the Document
libparted2/copyright: except as expressly provided for under this License. Any other
libparted2/copyright: attempt to copy, modify, sublicense or distribute the Document is
libparted2/copyright: void, and will automatically terminate your rights under this
libparted2/copyright: License. However, parties who have received copies, or rights,
libparted2/copyright: from you under this License will not have their licenses
libparted2/copyright: terminated so long as such parties remain in full compliance.
libparted2/copyright:
libparted2/copyright: 10. FUTURE REVISIONS OF THIS LICENSE
libparted2/copyright:
libparted2/copyright: The Free Software Foundation may publish new, revised versions of
libparted2/copyright: the GNU Free Documentation License from time to time. Such new
libparted2/copyright: versions will be similar in spirit to the present version, but may
libparted2/copyright: differ in detail to address new problems or concerns. See
libparted2/copyright: `http://www.gnu.org/copyleft/'.
libparted2/copyright:
libparted2/copyright: Each version of the License is given a distinguishing version
libparted2/copyright: number. If the Document specifies that a particular numbered
libparted2/copyright: version of this License "or any later version" applies to it, you
libparted2/copyright: have the option of following the terms and conditions either of
libparted2/copyright: that specified version or of any later version that has been
libparted2/copyright: published (not as a draft) by the Free Software Foundation. If
libparted2/copyright: the Document does not specify a version number of this License,
libparted2/copyright: you may choose any version ever published (not as a draft) by the
libparted2/copyright: Free Software Foundation.
libparted2/copyright:
libparted2/copyright:A.1.1 ADDENDUM: How to use this License for your documents
libparted2/copyright:----------------------------------------------------------
libparted2/copyright:
libparted2/copyright: To use this License in a document you have written, include a copy of
libparted2/copyright: the License in the document and put the following copyright and license
libparted2/copyright: notices just after the title page:
libparted2/copyright:
libparted2/copyright: Copyright (C) YEAR YOUR NAME.
libparted2/copyright: Permission is granted to copy, distribute and/or modify this document
libparted2/copyright: under the terms of the GNU Free Documentation License, Version 1.1
libparted2/copyright: or any later version published by the Free Software Foundation;
libparted2/copyright: with the Invariant Sections being LIST THEIR TITLES, with the
libparted2/copyright: Front-Cover Texts being LIST, and with the Back-Cover Texts being LIST.
libparted2/copyright: A copy of the license is included in the section entitled `"GNU

libparted2/copyright:
libparted2/copyright: If you have no Invariant Sections, write "with no Invariant Sections"

libparted2/copyright: instead of saying which ones are invariant. If you have no Front-Cover
libparted2/copyright: Texts, write "no Front-Cover Texts" instead of "Front-Cover Texts being

libparted2/copyright:
libparted2/copyright: If your document contains nontrivial examples of program code, we
libparted2/copyright: recommend releasing these examples in parallel under your choice of
libparted2/copyright: free software license, such as the GNU General Public License, to
libparted2/copyright: permit their use in free software.

libperl5.22/copyright:  this website, you have the option of using the old-style BSD license
libperl5.22/copyright:  to use the code instead of other the licenses. This option has been
libperl5.22/copyright:  provided for people who can't figure out what I talking about with my

libperl5.22/copyright: It is therefore assumed that the relevant part of the Perl source
libperl5.22/copyright: is licensed under either the "Paul Hsieh derivative license" or
libperl5.22/copyright: the "the old-style BSD license", which have been included at
libperl5.22/copyright: the end of file with the codenames HSIEH-DERIVATIVE and HSIEH-BSD.
libperl5.22/copyright: 
libperl5.22/copyright: Additionally, the "hash.html" document has this statement for the
libperl5.22/copyright: relevant source code:
libperl5.22/copyright: 
libperl5.22/copyright: IMPORTANT NOTE: Since there has been a lot of interest for the code
libperl5.22/copyright: below, I have decided to additionally provide it under the LGPL 2.1

libperl5.22/copyright: unless otherwise specified.
libperl5.22/copyright: 
libperl5.22/copyright: The LGPL 2.1 is not necessarily a more liberal license than my

libperl5.22/copyright: Preamble
libperl5.22/copyright:
libperl5.22/copyright: This license establishes the terms under which a given free software
libperl5.22/copyright: Package may be copied, modified, distributed, and/or redistributed.
libperl5.22/copyright: The intent is that the Copyright Holder maintains some artistic
libperl5.22/copyright: control over the development of that Package while still keeping the
libperl5.22/copyright: Package available as open source and free software.
libperl5.22/copyright:
libperl5.22/copyright: You are always permitted to make arrangements wholly outside of this
libperl5.22/copyright: license directly with the Copyright Holder of a given Package. If the
From Ubuntu 16.04 LTS

libperl5.22/copyright: terms of this license do not permit the full use that you propose to
libperl5.22/copyright: make of the Package, you should contact the Copyright Holder and seek
libperl5.22/copyright: a different licensing arrangement.
libperl5.22/copyright: Definitions

libperl5.22/copyright: "Copyright Holder" means the individual(s) or organization(s) named in
libperl5.22/copyright: the copyright notice for the entire Package.
libperl5.22/copyright: "Contributor" means any party that has contributed code or other
libperl5.22/copyright: material to the Package, in accordance with the Copyright Holder's
libperl5.22/copyright: procedures.
libperl5.22/copyright: "You" and "your" means any person who would like to copy, distribute,
libperl5.22/copyright: or modify the Package.
libperl5.22/copyright: "Package" means the collection of files distributed by the Copyright
libperl5.22/copyright: Holder, and derivatives of that collection and/or of those files. A
libperl5.22/copyright: given Package may consist of either the Standard Version, or a
libperl5.22/copyright: Modified Version.
libperl5.22/copyright: "Distribute" means providing a copy of the Package or making it
libperl5.22/copyright: accessible to anyone else, or in the case of a company or
libperl5.22/copyright: organization, to others outside of your company or organization.
libperl5.22/copyright: "Distributor Fee" means any fee that you charge for Distributing this
libperl5.22/copyright: Package or providing support for this Package to another party. It
libperl5.22/copyright: does not mean licensing fees.
libperl5.22/copyright: "Standard Version" refers to the Package if it has not been modified,
libperl5.22/copyright: or has been modified only in ways explicitly requested by the
libperl5.22/copyright: Copyright Holder.
libperl5.22/copyright: "Modified Version" means the Package, if it has been changed, and such
libperl5.22/copyright: changes were not explicitly requested by the Copyright Holder.
libperl5.22/copyright: "Original License" means this Artistic License as Distributed with the
libperl5.22/copyright: Standard Version of the Package, in its current version or as it may
libperl5.22/copyright: be modified by The Perl Foundation in the future.
libperl5.22/copyright: "Source" form means the source code, documentation source, and
libperl5.22/copyright: configuration files for the Package.
libperl5.22/copyright: "Compiled" form means the compiled bytecode, object code, binary, or
libperl5.22/copyright: any other form resulting from mechanical transformation or translation
From Ubuntu 16.04 LTS

libperl5.22/copyright: Permission for Use and Modification Without Distribution

libperl5.22/copyright: (1) You are permitted to use the Standard Version and create and use
libperl5.22/copyright: Modified Versions for any purpose without restriction, provided that
libperl5.22/copyright: you do not Distribute the Modified Version.

libperl5.22/copyright: Permissions for Redistribution of the Standard Version

libperl5.22/copyright: (2) You may Distribute verbatim copies of the Source form of the
libperl5.22/copyright: Standard Version of this Package in any medium without restriction,
libperl5.22/copyright: either gratis or for a Distributor Fee, provided that you duplicate
libperl5.22/copyright: all of the original copyright notices and associated disclaimers. At
libperl5.22/copyright: your discretion, such verbatim copies may or may not include a
libperl5.22/copyright: Compiled form of the Package.

libperl5.22/copyright: (3) You may apply any bug fixes, portability changes, and other
libperl5.22/copyright: modifications made available from the Copyright Holder. The resulting
libperl5.22/copyright: Package will still be considered the Standard Version, and as such
libperl5.22/copyright: will be subject to the Original License.

libperl5.22/copyright: Distribution of Modified Versions of the Package as Source

libperl5.22/copyright: (4) You may Distribute your Modified Version as Source (either gratis
libperl5.22/copyright: or for a Distributor Fee, and with or without a Compiled form of the
libperl5.22/copyright: Modified Version) provided that you clearly document how it differs
libperl5.22/copyright: from the Standard Version, including, but not limited to, documenting
libperl5.22/copyright: any non-standard features, executables, or modules, and provided that

libperl5.22/copyright: Distribution of Compiled Forms of the Standard Version or Modified
libperl5.22/copyright: Versions without the Source
libperl5.22/copyright: (5) You may Distribute Compiled forms of the Standard Version without
libperl5.22/copyright: the Source, provided that you include complete instructions on how to
libperl5.22/copyright: get the Source of the Standard Version. Such instructions must be
libperl5.22/copyright: valid at the time of your distribution. If these instructions, at any
libperl5.22/copyright: time while you are carrying out such distribution, become invalid, you
libperl5.22/copyright: must provide new instructions on demand or cease further distribution.
libperl5.22/copyright: If you provide valid instructions or cease distribution within thirty
days after you become aware that the instructions are invalid, then
libperl5.22/copyright: you do not forfeit any of your rights under this license.
libperl5.22/copyright: (6) You may Distribute a Modified Version in Compiled form without the
Source, provided that you comply with Section 4 with respect to the
Source of the Modified Version.
libperl5.22/copyright: (7) You may aggregate the Package (either the Standard Version or
Modified Version) with other packages and Distribute the resulting
aggregation provided that you do not charge a licensing fee for the
Package. Distributor Fees are permitted, and licensing fees for other
components in the aggregation are permitted. The terms of this license
apply to the use and Distribution of the Standard or Modified Versions
as included in the aggregation.
libperl5.22/copyright: (8) You are permitted to link Modified and Standard Versions with
other works, to embed the Package in a larger work of your own, or to
build stand-alone binary or bytecode versions of applications that
include the Package, and Distribute the result without restriction,
provided the result does not expose a direct interface to the Package.
libperl5.22/copyright: (9) Works (including, but not limited to, modules and scripts) that
merely extend or make use of the Package, do not, by themselves, cause
the Package to be a Modified Version. In addition, such works are not
considered parts of the Package itself, and are not subject to the
terms of this license.

From Ubuntu 16.04 LTS
libperl5.22/copyright: (10) Any use, modification, and distribution of the Standard or
libperl5.22/copyright: Modified Versions is governed by this Artistic License. By using,
libperl5.22/copyright: modifying or distributing the Package, you accept this license. Do not
libperl5.22/copyright: use, modify, or distribute the Package, if you do not accept this
libperl5.22/copyright: license.
libperl5.22/copyright: .
libperl5.22/copyright: (11) If your Modified Version has been derived from a Modified Version
libperl5.22/copyright: made by someone other than you, you are nevertheless required to

libperl5.22/copyright: sell, import and otherwise transfer the Package with respect to any
libperl5.22/copyright: patent claims licensable by the Copyright Holder that are necessarily
libperl5.22/copyright: infringed by the Package. If you institute patent litigation
libperl5.22/copyright: (including a cross-claim or counterclaim) against any party alleging
libperl5.22/copyright: that the Package constitutes direct or contributory patent
libperl5.22/copyright: infringement, then this Artistic License to you shall terminate on the

libperl5.22/copyright: Statement of Purpose

libperl5.22/copyright: The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work.

libperl5.22/copyright: of authorship and/or a database (each, a "Work").

libperl5.22/copyright: Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and
From Ubuntu 16.04 LTS

libperl5.22/copyright: scientific works ("Commons") that the public can reliably and without
libperl5.22/copyright: fear of later claims of infringement build upon, modify, incorporate in
libperl5.22/copyright: other works, reuse and redistribute as freely as possible in any form
libperl5.22/copyright: whatsoever and for any purposes, including without limitation commercial
libperl5.22/copyright: purposes. These owners may contribute to the Commons to promote the ideal
libperl5.22/copyright: of a free culture and the further production of creative, cultural and
libperl5.22/copyright: scientific works, or to gain reputation or greater distribution for
libperl5.22/copyright: their Work in part through the use and efforts of others.

libperl5.22/copyright: For these and/or other purposes and motivations, and without any
libperl5.22/copyright: expectation of additional consideration or compensation, the person
libperl5.22/copyright: associating CC0 with a Work (the "Affirmer"), to the extent that
libperl5.22/copyright: he or she is an owner of Copyright and Related Rights in the Work,
libperl5.22/copyright: voluntarily elects to apply CC0 to the Work and publicly distribute
libperl5.22/copyright: the Work under its terms, with knowledge of his or her Copyright and
libperl5.22/copyright: Related Rights in the Work and the meaning and intended legal effect
libperl5.22/copyright: of CC0 on those rights.

libperl5.22/copyright: 1. Copyright and Related Rights. A Work made available under CC0 may be
libperl5.22/copyright: protected by copyright and related or neighboring rights ("Copyright
libperl5.22/copyright: and Related Rights"). Copyright and Related Rights include, but are
libperl5.22/copyright: not limited to, the following:

libperl5.22/copyright: the right to reproduce, adapt, distribute, perform, display,
libperl5.22/copyright: communicate, and translate a Work;
libperl5.22/copyright: moral rights retained by the original author(s) and/or performer(s);
libperl5.22/copyright: publicity and privacy rights pertaining to a person's image or
libperl5.22/copyright: likeness depicted in a Work;
libperl5.22/copyright: rights protecting against unfair competition in regards to a Work,
libperl5.22/copyright: subject to the limitations in paragraph 4(a), below;
libperl5.22/copyright: rights protecting the extraction, dissemination, use and reuse of data in a Work;
libperl5.22/copyright: database rights (such as those arising under Directive 96/9/EC
libperl5.22/copyright: on the legal protection of databases, and under any national
libperl5.22/copyright: implementation thereof, including any amended or successor version
libperl5.22/copyright: of such directive); and
libperl5.22/copyright: other similar, equivalent or corresponding rights throughout the world
libperl5.22/copyright: based on applicable law or treaty, and any national implementations
libperl5.22/copyright: thereof.
From Ubuntu 16.04 LTS

libperl5.22/copyright: 2. Waiver. To the greatest extent permitted by, but not in contravention
libperl5.22/copyright: of, applicable law, Affirmer hereby overtly, fully, permanently,
libperl5.22/copyright: irrevocably and unconditionally waives, abandons, and surrenders all
libperl5.22/copyright: of Affirmer's Copyright and Related Rights and associated claims and
libperl5.22/copyright: causes of action, whether now known or unknown (including existing
libperl5.22/copyright: as well as future claims and causes of action), in the Work (i) in
libperl5.22/copyright: all territories worldwide, (ii) for the maximum duration provided by
libperl5.22/copyright: applicable law or treaty (including future time extensions), (iii)
libperl5.22/copyright: in any current or future medium and for any number of copies, and (iv)
libperl5.22/copyright: for any purpose whatsoever, including without limitation commercial,
libperl5.22/copyright: advertising or promotional purposes (the "Waiver"). Affirmer makes the
libperl5.22/copyright: Waiver for the benefit of each member of the public at large and to the
libperl5.22/copyright: detriment of Affirmer's heirs and successors, fully intending that such
libperl5.22/copyright: Waiver shall not be subject to revocation, rescission, cancellation,
libperl5.22/copyright: termination, or any other legal or equitable action to disrupt the
libperl5.22/copyright: quiet enjoyment of the Work by the public as contemplated by Affirmer's
libperl5.22/copyright: express Statement of Purpose.

libperl5.22/copyright: 3. Public License Fallback. Should any part of the Waiver for any
libperl5.22/copyright: reason be judged legally invalid or ineffective under applicable law,
libperl5.22/copyright: then the Waiver shall be preserved to the maximum extent permitted
libperl5.22/copyright: taking into account Affirmer's express Statement of Purpose. In
libperl5.22/copyright: addition, to the extent the Waiver is so judged Affirmer hereby
libperl5.22/copyright: grants to each affected person a royalty-free, non transferable, non
libperl5.22/copyright: sublicensable, non exclusive, irrevocable and unconditional license
libperl5.22/copyright: to exercise Affirmer's Copyright and Related Rights in the Work (i)
libperl5.22/copyright: in all territories worldwide, (ii) for the maximum duration provided
libperl5.22/copyright: by applicable law or treaty (including future time extensions), (iii)
libperl5.22/copyright: in any current or future medium and for any number of copies, and (iv)
libperl5.22/copyright: for any purpose whatsoever, including without limitation commercial,
libperl5.22/copyright: advertising or promotional purposes (the "License"). The License shall
libperl5.22/copyright: be deemed effective as of the date CC0 was applied by Affirmer to the
libperl5.22/copyright: Work. Should any part of the License for any reason be judged legally
libperl5.22/copyright: invalid or ineffective under applicable law, such partial invalidity
libperl5.22/copyright: or ineffectiveness shall not invalidate the remainder of the License,
libperl5.22/copyright: and in such case Affirmer hereby affirms that he or she will not (i)
libperl5.22/copyright: exercise any of his or her remaining Copyright and Related Rights in
libperl5.22/copyright: the Work or (ii) assert any associated claims and causes of action
libperl5.22/copyright: with respect to the Work, in either case contrary to Affirmer's express
libperl5.22/copyright: Statement of Purpose.

libperl5.22/copyright: 4. Limitations and Disclaimers.

libperl5.22/copyright: No trademark or patent rights held by Affirmer are waived,
libperl5.22/copyright: abandoned, surrendered, licensed or otherwise affected by this
document.

libperl5.22/copyright: Affirmer offers the Work as-is and makes no representations or
warranties of any kind concerning the Work, express, implied,
statutory or otherwise, including without limitation warranties
of title, merchantability, fitness for a particular purpose, non
infringement, or the absence of latent or other defects, accuracy,
or the present or absence of errors, whether or not discoverable,
all to the greatest extent permissible under applicable law.

libperl5.22/copyright: Affirmer disclaims responsibility for clearing rights of other
persons that may apply to the Work or any use thereof, including
without limitation any person's Copyright and Related Rights in the
Work. Further, Affirmer disclaims responsibility for obtaining any
necessary consents, permissions or other rights required for any
use of the Work.

libperl5.22/copyright: Affirmer understands and acknowledges that Creative Commons is not
a party to this document and has no duty or obligation with respect
to this CC0 or use of the Work.

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

libpython2.7-stdlib/copyright:A. HISTORY OF THE SOFTWARE

libpython2.7-stdlib/copyright:---------------------------

libpython2.7-stdlib/copyright:

libpython2.7-stdlib/copyright:Python was created in the early 1990s by Guido van Rossum at Stichting

libpython2.7-stdlib/copyright:Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands

libpython2.7-stdlib/copyright:as a successor of a language called ABC. Guido remains Python's

libpython2.7-stdlib/copyright:principal author, although it includes many contributions from others.

libpython2.7-stdlib/copyright:

libpython2.7-stdlib/copyright:In 1995, Guido continued his work on Python at the Corporation for

libpython2.7-stdlib/copyright:National Research Initiatives (CNRI, see http://www.cnri.reston.va.us)

libpython2.7-stdlib/copyright:in Reston, Virginia where he released several versions of the

libpython2.7-stdlib/copyright:software.

libpython2.7-stdlib/copyright:

libpython2.7-stdlib/copyright:In May 2000, Guido and the Python core development team moved to

libpython2.7-stdlib/copyright:BeOpen.com to form the BeOpen PythonLabs team. In October of the same

libpython2.7-stdlib/copyright:year, the PythonLabs team moved to Digital Creations (now Zope

libpython2.7-stdlib/copyright:Corporation, see http://www.zope.com). In 2001, the Python Software

libpython2.7-stdlib/copyright:Foundation (PSF, see http://www.python.org/psf/) was formed, a

libpython2.7-stdlib/copyright:non-profit organization created specifically to own Python-related

libpython2.7-stdlib/copyright:Intellectual Property. Zope Corporation is a sponsoring member of

libpython2.7-stdlib/copyright:the PSF.

libpython2.7-stdlib/copyright:

libpython2.7-stdlib/copyright:All Python releases are Open Source (see http://www.opensource.org for

libpython2.7-stdlib/copyright:the Open Source Definition). Historically, most, but not all, Python

libpython2.7-stdlib/copyright:releases have also been GPL-compatible; the table below summarizes

libpython2.7-stdlib/copyright:the various releases.

(1) GPL-compatible doesn't mean that we’re distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don’t.

CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1

This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following..."
libpython2.7-stdlib/copyright:3. In the event Licensee prepares a derivative work that is based on
libpython2.7-stdlib/copyright:or incorporates Python 1.6.1 or any part thereof, and wants to make
libpython2.7-stdlib/copyright:the derivative work available to others as provided herein, then
libpython2.7-stdlib/copyright:Licensee hereby agrees to include in any such work a brief summary of
libpython2.7-stdlib/copyright:the changes made to Python 1.6.1.

libpython2.7-stdlib/copyright:4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS"
libpython2.7-stdlib/copyright:basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR
libpython2.7-stdlib/copyright:IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND

libpython2.7-stdlib/copyright:6. This License Agreement will automatically terminate upon a material
libpython2.7-stdlib/copyright:breach of its terms and conditions.

libpython2.7-stdlib/copyright:7. This License Agreement shall be governed by the federal
libpython2.7-stdlib/copyright:intellectual property law of the United States, including without
libpython2.7-stdlib/copyright:limitation the federal copyright law, and, to the extent such
libpython2.7-stdlib/copyright:U.S. federal law does not apply, by the law of the Commonwealth of
libpython2.7-stdlib/copyright:Virginia, excluding Virginia's conflict of law provisions.

libpython2.7-stdlib/copyright:Notwithstanding the foregoing, with regard to derivative works based
libpython2.7-stdlib/copyright:on Python 1.6.1 that incorporate non-separable material that was
libpython2.7-stdlib/copyright:previously distributed under the GNU General Public License (GPL), the
libpython2.7-stdlib/copyright:law of the Commonwealth of Virginia shall govern this License
libpython2.7-stdlib/copyright:Agreement only as to issues arising under or with respect to
libpython2.7-stdlib/copyright:Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this
libpython2.7-stdlib/copyright:License Agreement shall be deemed to create any relationship of
libpython2.7-stdlib/copyright:agency, partnership, or joint venture between CNRI and Licensee. This

Modified by Jack Jansen, CWI, July 1995:
- Use binascii module to do the actual line-by-line conversion between ascii and binary. This results in a 1000-fold speedup. The C version is still 5 times faster, though.
- Arguments more compliant with python standard

libpython3.5/copyright:A. HISTORY OF THE SOFTWARE
libpython3.5/copyright:======================================
libpython3.5/copyright:
libpython3.5/copyright:Python was created in the early 1990s by Guido van Rossum at Stichting
libpython3.5/copyright:Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands
libpython3.5/copyright:as a successor of a language called ABC. Guido remains Python's
libpython3.5/copyright:principal author, although it includes many contributions from others.
libpython3.5/copyright:
libpython3.5/copyright:In 1995, Guido continued his work on Python at the Corporation for
libpython3.5/copyright:National Research Initiatives (CNRI, see http://www.cnri.reston.va.us)
libpython3.5/copyright:in Reston, Virginia where he released several versions of the
libpython3.5/copyright:software.
libpython3.5/copyright:
In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see http://www.zope.com). In 2001, the Python Software Foundation (PSF, see http://www.python.org/psf/) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see http://www.opensource.org for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

**Footnotes:**

1. GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

2. According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

A. HISTORY OF THE SOFTWARE

Python was created in the early 1990s by Guido van Rossum at Stichting
Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands
as a successor of a language called ABC. Guido remains Python's
principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for
National Research Initiatives (CNRI, see http://www.cnri.reston.va.us)
in Reston, Virginia where he released several versions of the
software.

In May 2000, Guido and the Python core development team moved to
BeOpen.com to form the BeOpen PythonLabs team. In October of the same
year, the PythonLabs team moved to Digital Creations (now Zope)
Corporation, see http://www.zope.com). In 2001, the Python Software
From Ubuntu 16.04 LTS

Foundation (PSF, see http://www.python.org/psf/) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see http://www.opensource.org for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

**Footnotes:**

1. GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

2. According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

**Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.**

libpython3.5-stdlib/copyright:==============
libpython3.5-stdlib/copyright:
libpython3.5-stdlib/copyright:Python was created in the early 1990s by Guido van Rossum at Stichting
libpython3.5-stdlib/copyright:Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands
libpython3.5-stdlib/copyright:as a successor of a language called ABC. Guido remains Python's
libpython3.5-stdlib/copyright:principal author, although it includes many contributions from others.
libpython3.5-stdlib/copyright:
libpython3.5-stdlib/copyright:In 1995, Guido continued his work on Python at the Corporation for
libpython3.5-stdlib/copyright:National Research Initiatives (CNRI, see http://www.cnri.reston.va.us)
libpython3.5-stdlib/copyright:in Reston, Virginia where he released several versions of the
libpython3.5-stdlib/copyright:software.
libpython3.5-stdlib/copyright:
libpython3.5-stdlib/copyright:In May 2000, Guido and the Python core development team moved to
libpython3.5-stdlib/copyright:BeOpen.com to form the BeOpen PythonLabs team. In October of the same
libpython3.5-stdlib/copyright:year, the PythonLabs team moved to Digital Creations (now Zope
libpython3.5-stdlib/copyright:Corporation, see http://www.zope.com). In 2001, the Python Software
libpython3.5-stdlib/copyright:Foundation (PSF, see http://www.python.org/psf/) was formed, a
libpython3.5-stdlib/copyright:non-profit organization created specifically to own Python-related

libpython3.5-stdlib/copyright:Footnotes:
libpython3.5-stdlib/copyright:
libpython3.5-stdlib/copyright:(1) GPL-compatible doesn't mean that we're distributing Python under
libpython3.5-stdlib/copyright: the GPL. All Python licenses, unlike the GPL, let you distribute
libpython3.5-stdlib/copyright: a modified version without making your changes open source. The
libpython3.5-stdlib/copyright: GPL-compatible licenses make it possible to combine Python with
libpython3.5-stdlib/copyright: other software that is released under the GPL; the others don't.
libpython3.5-stdlib/copyright:

libpython3.5-stdlib/copyright:(2) According to Richard Stallman, 1.6.1 is not GPL-compatible,
libpython3.5-stdlib/copyright: because its license has a choice of law clause. According to
libpython3.5-stdlib/copyright: CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1
libpython3.5-stdlib/copyright: is "not incompatible" with the GPL.
libpython3.5-stdlib/copyright:

libpython3.5-stdlib/copyright:Thanks to the many outside volunteers who have worked under Guido's

libpython3-stdlib/copyright: A. HISTORY OF THE SOFTWARE

libpython3-stdlib/copyright: Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

libpython3-stdlib/copyright: In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see http://www.zope.com). In 2001, the Python Software Foundation (PSF, see http://www.python.org/psf/) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

libpython3-stdlib/copyright: All Python releases are Open Source (see http://www.opensource.org for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.
From Ubuntu 16.04 LTS

libpython3-stdlib/copyright:(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

libpython3-stdlib/copyright: Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

libpython3-stdlib/copyright:
libpython3-stdlib/copyright:A. HISTORY OF THE SOFTWARE
libpython3-stdlib/copyright:===============================================
libpython3-stdlib/copyright:
libpython3-stdlib/copyright:Python was created in the early 1990s by Guido van Rossum at Stichting
libpython3-stdlib/copyright:Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands
libpython3-stdlib/copyright:as a successor of a language called ABC. Guido remains Python's
libpython3-stdlib/copyright:principal author, although it includes many contributions from others.
libpython3-stdlib/copyright:
libpython3-stdlib/copyright:In 1995, Guido continued his work on Python at the Corporation for
libpython3-stdlib/copyright:National Research Initiatives (CNRI, see http://www.cnri.reston.va.us)
libpython3-stdlib/copyright:in Reston, Virginia where he released several versions of the
libpython3-stdlib/copyright:software.
libpython3-stdlib/copyright:
libpython3-stdlib/copyright:In May 2000, Guido and the Python core development team moved to
libpython3-stdlib/copyright:BeOpen.com to form the BeOpen PythonLabs team. In October of the same
libpython3-stdlib/copyright:year, the PythonLabs team moved to Digital Creations (now Zope
libpython3-stdlib/copyright:Corporation, see http://www.zope.com). In 2001, the Python Software
libpython3-stdlib/copyright:Foundation (PSF, see http://www.python.org/psf/) was formed, a
libpython3-stdlib/copyright:non-profit organization created specifically to own Python-related
libpython3-stdlib/copyright:Intellectual Property. Zope Corporation is a sponsoring member of
libpython3-stdlib/copyright:the PSF.
libpython3-stdlib/copyright:
libpython3-stdlib/copyright:All Python releases are Open Source (see http://www.opensource.org for
libpython3-stdlib/copyright:the Open Source Definition). Historically, most, but not all, Python
libpython3-stdlib/copyright:releases have also been GPL-compatible; the table below summarizes
libpython3-stdlib/copyright:the various releases.

Footnotes:

(1) GPL-compatible doesn’t mean that we’re distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don’t.
According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

libquadmath0/copyright: This is the Debian GNU/Linux prepackaged version of the GNU compiler collection, containing Ada, C, C++, Fortran 95, Java, Objective-C, Objective-C++, and Treelang compilers, documentation, and support libraries. In addition, Debian provides the gdc compiler, either in the same source package, or built from a separate same source package.

libquadmath0/copyright: Packaging is done by the Debian GCC Maintainers, with sources obtained from:

libquadmath0/copyright: ftp://gcc.gnu.org/pub/gcc/releases/ (for full releases)
libquadmath0/copyright: svn://gcc.gnu.org/svn/gcc/ (for prereleases)
libquadmath0/copyright: http://bitbucket.org/goshawk/gdc (for D)

libquadmath0/copyright: The current gcc-5 source package is taken from the SVN gcc-5-branch.

libquadmath0/copyright: Changes: See changelog.Debian.gz

libquadmath0/copyright: Debian splits the GNU Compiler Collection into packages for each language, library, and documentation as follows:

<table>
<thead>
<tr>
<th>Language</th>
<th>Compiler package</th>
<th>Library package</th>
<th>Documentation</th>
</tr>

libquadmath0/copyright: 'lib', for example lib32stdc++6. Similarly, on some 32-bit platforms which
libquadmath0/copyright: can also run 64-bit code, Debian provides additional packages with names
libquadmath0/copyright: beginning with 'lib64' instead of 'lib'. These packages contain 64-bit
libquadmath0/copyright: versions of the libraries. (At this time, not all platforms and not all
libquadmath0/copyright: libraries support biarch.) The license terms for these lib32 or lib64
libquadmath0/copyright: packages are identical to the ones for the lib packages.

libquadmath0/copyright:GCC RUNTIME LIBRARY EXCEPTION
libquadmath0/copyright:
libquadmath0/copyright:Version 3.1, 31 March 2009
libquadmath0/copyright:
libquadmath0/copyright:Copyright (C) 2009 Free Software Foundation, Inc. <http://fsf.org/>
libquadmath0/copyright:
libquadmath0/copyright:Everyone is permitted to copy and distribute verbatim copies of this
libquadmath0/copyright:license document, but changing it is not allowed.
libquadmath0/copyright:
libquadmath0/copyright:This GCC Runtime Library Exception ("Exception") is an additional
libquadmath0/copyright:permission under section 7 of the GNU General Public License, version
libquadmath0/copyright:3 ("GPLv3"). It applies to a given file (the "Runtime Library") that
libquadmath0/copyright:bears a notice placed by the copyright holder of the file stating that
libquadmath0/copyright:the file is governed by GPLv3 along with this Exception.
libquadmath0/copyright:
libquadmath0/copyright:When you use GCC to compile a program, GCC may combine portions of
libquadmath0/copyright:certain GCC header files and runtime libraries with the compiled
libquadmath0/copyright:program. The purpose of this Exception is to allow compilation of
libquadmath0/copyright:non-GPL (including proprietary) programs to use, in this way, the
libquadmath0/copyright:header files and runtime libraries covered by this Exception.
libquadmath0/copyright:
libquadmath0/copyright:0. Definitions.
libquadmath0/copyright:
libquadmath0/copyright:A file is an "Independent Module" if it either requires the Runtime
libquadmath0/copyright:Library for execution after a Compilation Process, or makes use of an
libquadmath0/copyright:interface provided by the Runtime Library, but is not otherwise based
libquadmath0/copyright:on the Runtime Library.
libquadmath0/copyright:
libquadmath0/copyright:"GCC" means a version of the GNU Compiler Collection, with or without
libquadmath0/copyright:modifications, governed by version 3 (or a specified later version) of
libquadmath0/copyright:the GNU General Public License (GPL) with the option of using any
libquadmath0/copyright:subsequent versions published by the FSF.
libquadmath0/copyright:
libquadmath0/copyright:"GPL-compatible Software" is software whose conditions of propagation,
libquadmath0/copyright:modification and use would permit combination with GCC in accord with
libquadmath0/copyright:the license of GCC.
libquadmath0/copyright:
libquadmath0/copyright:"Target Code" refers to output from any compiler for a real or virtual
libquadmath0/copyright:target processor architecture, in executable form or suitable for
libquadmath0/copyright:input to an assembler, loader, linker and/or execution
libquadmath0/copyright:phase. Notwithstanding that, Target Code does not include data in any
libquadmath0/copyright:format that is used as a compiler intermediate representation, or used
libquadmath0/copyright:for producing a compiler intermediate representation.
From Ubuntu 16.04 LTS

libquadmath0/copyright:
libquadmath0/copyright:The "Compilation Process" transforms code entirely represented in
libquadmath0/copyright:non-intermediate languages designed for human-written code, and/or in
libquadmath0/copyright:Java Virtual Machine byte code, into Target Code. Thus, for example,
libquadmath0/copyright:use of source code generators and preprocessors need not be considered
libquadmath0/copyright:part of the Compilation Process, since the Compilation Process can be
libquadmath0/copyright:understood as starting with the output of the generators or
libquadmath0/copyright:preprocessors.
libquadmath0/copyright:
libquadmath0/copyright:A Compilation Process is "Eligible" if it is done using GCC, alone or
libquadmath0/copyright:with other GPL-compatible software, or if it is done without using any
libquadmath0/copyright:work based on GCC. For example, using non-GPL-compatible Software to
libquadmath0/copyright:optimize any GCC intermediate representations would not qualify as an
libquadmath0/copyright:Eligible Compilation Process.
libquadmath0/copyright:
libquadmath0/copyright:1. Grant of Additional Permission.
libquadmath0/copyright:
libquadmath0/copyright:You have permission to propagate a work of Target Code formed by
libquadmath0/copyright:combining the Runtime Library with Independent Modules, even if such
libquadmath0/copyright:propagation would otherwise violate the terms of GPLv3, provided that
libquadmath0/copyright:all Target Code was generated by Eligible Compilation Processes. You
libquadmath0/copyright:may then convey such a combination under terms of your choice,
libquadmath0/copyright:consistent with the licensing of the Independent Modules.
libquadmath0/copyright:
libquadmath0/copyright:2. No Weakening of GCC Copyleft.
libquadmath0/copyright:
libquadmath0/copyright:The availability of this Exception does not imply any general
libquadmath0/copyright:presumption that third-party software is unaffected by the copyleft
libquadmath0/copyright:requirements of the license of GCC.

The libgcj library is licensed under the terms of the GNU General Public License, with a special exception:

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. libstdc++-5-dev/copyright:The "Compilation Process" transforms code entirely represented in
libstdc++-5-dev/copyright:non-intermediate languages designed for human-written code, and/or in
libstdc++-5-dev/copyright:Java Virtual Machine byte code, into Target Code. Thus, for example,
libstdc++-5-dev/copyright:use of source code generators and preprocessors need not be considered
libstdc++-5-dev/copyright:part of the Compilation Process, since the Compilation Process can be
libstdc++-5-dev/copyright:understood as starting with the output of the generators or
libstdc++-5-dev/copyright:preprocessors.
libstdc++-5-dev/copyright:
libstdc++-5-dev/copyright:A Compilation Process is "Eligible" if it is done using GCC, alone or
libstdc++-5-dev/copyright:with other GPL-compatible software, or if it is done without using any
libstdc++-5-dev/copyright:work based on GCC. For example, using non-GPL-compatible Software to
libstdc++-5-dev/copyright:optimize any GCC intermediate representations would not qualify as an
libstdc++-5-dev/copyright:Eligible Compilation Process.

libstdc++-5-dev/copyright:
libstdc++-5-dev/copyright:You have permission to propagate a work of Target Code formed by
libstdc++-5-dev/copyright:combining the Runtime Library with Independent Modules, even if such
libstdc++-5-dev/copyright:propagation would otherwise violate the terms of GPLv3, provided that
libstdc++-5-dev/copyright:all Target Code was generated by Eligible Compilation Processes. You
libstdc++-5-dev/copyright:may then convey such a combination under terms of your choice,
libstdc++-5-dev/copyright:consistent with the licensing of the Independent Modules.

libstdc++-5-dev/copyright:2. No Weakening of GCC Copyleft.

libstdc++6/copyright: GCC RUNTIME LIBRARY EXCEPTION

libstdc++6/copyright: Version 3.1, 31 March 2009

libstdc++6/copyright: Copyright (C) 2009 Free Software Foundation, Inc. <http://fsf.org/>

libstdc++6/copyright: Everyone is permitted to copy and distribute verbatim copies of this
license document, but changing it is not allowed.

libstdc++6/copyright: This GCC Runtime Library Exception ("Exception") is an additional
permission under section 7 of the GNU General Public License, version
3 ("GPLv3"). It applies to a given file (the "Runtime Library") that
bears a notice placed by the copyright holder of the file stating that
the file is governed by GPLv3 along with this Exception.

libstdc++6/copyright: When you use GCC to compile a program, GCC may combine portions of
certain GCC header files and runtime libraries with the compiled
program. The purpose of this Exception is to allow compilation of
non-GPL (including proprietary) programs to use, in this way, the
header files and runtime libraries covered by this Exception.
From Ubuntu 16.04 LTS

libstdc++/copyright:A file is an "Independent Module" if it either requires the Runtime
libstdc++/copyright:Library for execution after a Compilation Process, or makes use of an
libstdc++/copyright:interface provided by the Runtime Library, but is not otherwise based
libstdc++/copyright:on the Runtime Library.
libstdc++/copyright:
libstdc++/copyright:"GCC" means a version of the GNU Compiler Collection, with or without
libstdc++/copyright:modifications, governed by version 3 (or a specified later version) of
libstdc++/copyright:the GNU General Public License (GPL) with the option of using any
libstdc++/copyright:subsequent versions published by the FSF.
libstdc++/copyright:
libstdc++/copyright:"GPL-compatible Software" is software whose conditions of propagation,
libstdc++/copyright:modification and use would permit combination with GCC in accord with
libstdc++/copyright:the license of GCC.
libstdc++/copyright:
libstdc++/copyright:"Target Code" refers to output from any compiler for a real or virtual
libstdc++/copyright:target processor architecture, in executable form or suitable for
libstdc++/copyright:input to an assembler, loader, linker and/or execution
libstdc++/copyright:phase. Notwithstanding that, Target Code does not include data in any
libstdc++/copyright:format that is used as a compiler intermediate representation, or used
libstdc++/copyright:for producing a compiler intermediate representation.
libstdc++/copyright:
libstdc++/copyright:The "Compilation Process" transforms code entirely represented in
libstdc++/copyright:non-intermediate languages designed for human-written code, and/or in
libstdc++/copyright:Java Virtual Machine byte code, into Target Code. Thus, for example,
libstdc++/copyright:use of source code generators and preprocessors need not be considered
libstdc++/copyright:part of the Compilation Process, since the Compilation Process can be
libstdc++/copyright:understood as starting with the output of the generators or
libstdc++/copyright:preprocessors.
libstdc++/copyright:
libstdc++/copyright:A Compilation Process is "Eligible" if it is done using GCC, alone or
libstdc++/copyright:with other GPL-compatible software, or if it is done without using any
libstdc++/copyright:work based on GCC. For example, using non-GPL-compatible Software to
libstdc++/copyright:optimize any GCC intermediate representations would not qualify as an
libstdc++/copyright:Eligible Compilation Process.
libstdc++/copyright:
libstdc++/copyright:1. Grant of Additional Permission.
libstdc++/copyright:
libstdc++/copyright:You have permission to propagate a work of Target Code formed by
libstdc++/copyright:combining the Runtime Library with Independent Modules, even if such
libstdc++/copyright:propagation would otherwise violate the terms of GPLv3, provided that
libstdc++/copyright:all Target Code was generated by Eligible Compilation Processes. You
libstdc++/copyright:may then convey such a combination under terms of your choice,
libstdc++/copyright:consistent with the licensing of the Independent Modules.
libstdc++/copyright:
libstdc++/copyright:2. No Weakening of GCC Copyleft.
From Ubuntu 16.04 LTS

libstdc++6: The availability of this Exception does not imply any general presumption that third-party software is unaffected by the copyleft requirements of the license of GCC.

libsvn1/copyright: Licensed under the Academic Free License version 3.0:
libsvn1/copyright: http://www.opensource.org/licenses/academic.php

libsvn1/copyright: Academic Free License ("AFL") v. 3.0

libsvn1/copyright: This Academic Free License (the "License") applies to any original
libsvn1/copyright: work of authorship (the "Original Work") whose owner (the "Licensor")
libsvn1/copyright: has placed the following licensing notice adjacent to the copyright
libsvn1/copyright: notice for the Original Work:

libsvn1/copyright: Licensed under the Academic Free License version 3.0

libsvn1/copyright: 1) Grant of Copyright License. Licensor grants You a worldwide,
libsvn1/copyright: royalty-free, non-exclusive, sublicensable license, for the
libsvn1/copyright: duration of the copyright, to do the following:
libsvn1/copyright: a) to reproduce the Original Work in copies, either alone or as
libsvn1/copyright: part of a collective work;
libsvn1/copyright: b) to translate, adapt, alter, transform, modify, or arrange the
libsvn1/copyright: Original Work, thereby creating derivative works ("Derivative
libsvn1/copyright: Works") based upon the Original Work;
libsvn1/copyright: c) to distribute or communicate copies of the Original Work and
libsvn1/copyright: Derivative Works to the public, under any license of your

libsvn1/copyright: including Licensor's reserved rights and remedies, in this
libsvn1/copyright: Academic Free License;
libsvn1/copyright: d) to perform the Original Work publicly; and
libsvn1/copyright: e) to display the Original Work publicly.

libsvn1/copyright: 2) Grant of Patent License. Licensor grants You a worldwide,
libsvn1/copyright: royalty-free, non-exclusive, sublicensable license, under patent
From Ubuntu 16.04 LTS

libsvn1/copyright: claims owned or controlled by the Licensor that are embodied in
libsvn1/copyright: the Original Work as furnished by the Licensor, for the duration
libsvn1/copyright: of the patents, to make, use, sell, offer for sale, have made, and
libsvn1/copyright: import the Original Work and Derivative Works.
libsvn1/copyright:
libsvn1/copyright: 3) Grant of Source Code License. The term "Source Code" means the
libsvn1/copyright: preferred form of the Original Work for making modifications to it
libsvn1/copyright: and all available documentation describing how to modify the
libsvn1/copyright: Original Work. Licensor agrees to provide a machine-readable copy
libsvn1/copyright: of the Source Code of the Original Work along with each copy of
libsvn1/copyright: the Original Work that Licensor distributes. Licensor reserves the
libsvn1/copyright: right to satisfy this obligation by placing a machine-readable
libsvn1/copyright: copy of the Source Code in an information repository reasonably
libsvn1/copyright: calculated to permit inexpensive and convenient access by You for
libsvn1/copyright: as long as Licensor continues to distribute the Original Work.
libsvn1/copyright:
libsvn1/copyright: 4) Exclusions From License Grant. Neither the names of Licensor, nor
libsvn1/copyright: the names of any contributors to the Original Work, nor any of
libsvn1/copyright: their trademarks or service marks, may be used to endorse or
libsvn1/copyright: promote products derived from this Original Work without express
libsvn1/copyright: prior permission of the Licensor. Except as expressly stated
libsvn1/copyright: herein, nothing in this License grants any license to Licensor's
libsvn1/copyright: trademarks, copyrights, patents, trade secrets or any other
libsvn1/copyright: intellectual property. No patent license is granted to make, use,
libsvn1/copyright: sell, offer for sale, have made, or import embodiments of any
libsvn1/copyright: patent claims other than the licensed claims defined in Section
libsvn1/copyright: 2. No license is granted to the trademarks of Licensor even if
libsvn1/copyright: such marks are included in the Original Work. Nothing in this
libsvn1/copyright: License shall be interpreted to prohibit Licensor from licensing
libsvn1/copyright: under terms different from this License any Original Work that
libsvn1/copyright: Licensor otherwise would have a right to license.
libsvn1/copyright:
libsvn1/copyright: 5) External Deployment. The term "External Deployment" means the use,
libsvn1/copyright: distribution, or communication of the Original Work or Derivative
libsvn1/copyright: Works in any way such that the Original Work or Derivative Works
libsvn1/copyright: may be used by anyone other than You, whether those works are
libsvn1/copyright: distributed or communicated to those persons or made available as

libsvn1/copyright: condition for the grants of license hereunder, You must treat any
libsvn1/copyright: External Deployment by You of the Original Work or a Derivative
libsvn1/copyright: Work as a distribution under section 1(c).
libsvn1/copyright:
libsvn1/copyright: 6) Attribution Rights. You must retain, in the Source Code of any
libsvn1/copyright: Derivative Works that You create, all copyright, patent, or
libsvn1/copyright: trademark notices from the Source Code of the Original Work, as
From Ubuntu 16.04 LTS

libsvn1/copyright: 7) Warranty of Provenance and Disclaimer of Warranty. Licensor
libsvn1/copyright: warrants that the copyright in and to the Original Work and the
libsvn1/copyright: patent rights granted herein by Licensor are owned by the Licensor
libsvn1/copyright: or are sublicensed to You under the terms of this License with the
libsvn1/copyright: permission of the contributor(s) of those copyrights and patent
libsvn1/copyright: rights. Except as expressly stated in the immediately preceding
libsvn1/copyright: sentence, the Original Work is provided under this License on an
