Generator Exchange Rotor Program
Top 3 frequently asked commercial questions

Rotor Exchange Program: Benefits

- Cost effective and reduced risk
- 30 days quicker than in-shop rewind
- Reduced uncertainty with tested delivery

FAQs

#1 WHAT ARE THE COMMERCIAL TERMS AND WARRANTY CONDITIONS?
A: GE's standard warranty terms are 12 months from installation or 18 months from shipment. Terms can vary depending on the customer's needs.

#2 WHAT IS THE ESTIMATED CYCLE TIME FROM INQUIRY TO DELIVERY?
A: Cycle time will vary depending on the availability of the exchange asset, permitting and location of the unit. Fields have been shipped in less than 2 weeks but the actual cycle time would need to be determined and quoted.

#3 WHAT ARE THE ESTIMATED COST SAVINGS PER UNIT?
A: Cost savings can be determined by multiplying your daily revenue loss (or replacement value cost delta) by the length of outage time being saved by an exchange rotor. We estimate that about 4 weeks (or more) of critical path outage time can be saved by using an exchange rotor.
