

9HA GAS TURBINES (50 Hz)

The 9HA high efficiency, air-cooled gas turbine is the industry leader. With two available models—the 9HA.01 unit at 446 MW and the 9HA.02 unit at 544 MW—you can select the right capacity to meet your generation needs. Thanks to a simplified air-cooled architecture, advanced materials, and proven operability and reliability, GE’s 9HA units deliver exceptionally low life cycle cost per megawatt. The economies of scale created by this high power density gas turbine, combined with its more than 63 percent combined cycle efficiency, enable remarkably cost-effective conversion of fuel to electricity to help you meet increasingly dynamic power demands.

	9HA.01	9HA.02
SC OUTPUT (MW)	446	544
SC EFFICIENCY (%)	43.1	43.9
1X1 OUTPUT (MW)	659	804
1X1 EFFICIENCY (%)	63.4	63.5
2X1 OUTPUT (MW)	1,320	1,613
2X1 EFFICIENCY (%)	63.5	63.7

POWERING THE FUTURE with GAS POWER SYSTEMS
