

Repair for Performance*

Tailored Technology

Our team of engineers draws upon GE's proven repair technology to provide upgrades to existing hardware and develop tailored solutions for customers. We are constantly developing new repair technologies.

Global Presence

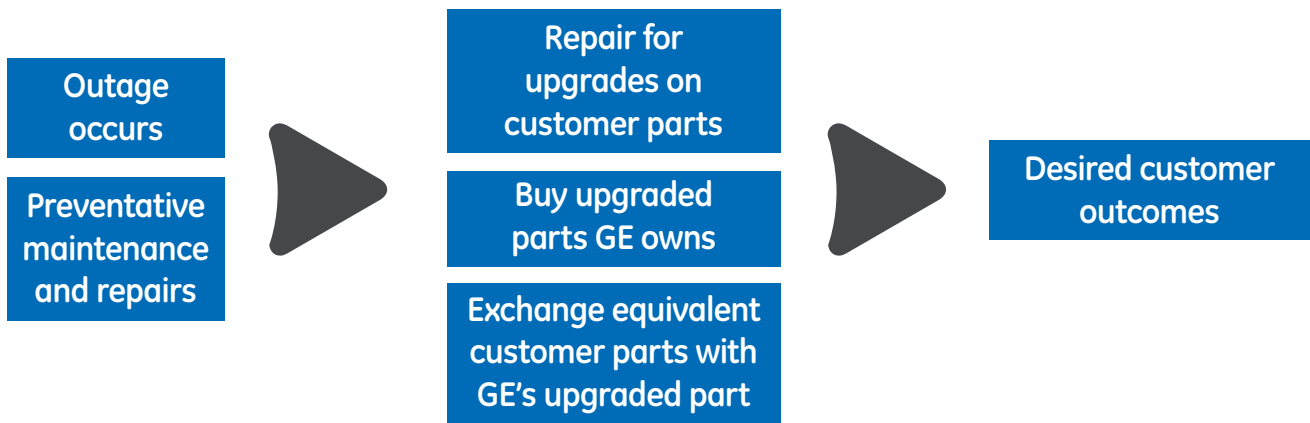

Our repair shops are strategically located for agile responsiveness, tapping into regional compliance and regulatory expertise.

Flexible Options

Discuss package deals with GE sales representatives that can overcome existing obstacles.

Outcomes-Driven Solutions with Repair for Performance*

- Improve performance of machine
- Reduce emissions
- Extend hot gas path intervals
- Increase total output
- Lower heat rate
- Opportunity to increase life and performance of parts through repair
