Introducing GE’s 9EMax

Delivering a game-changing leap in 9E gas turbine performance through a new 4-stage turbine module design.

- **simple cycle**: 37% efficiency
- **combined cycle**: 53.5% efficiency
- Maintenance intervals up to 32,000 hours
- Up to 900 starts

**OUTPUT UP TO:**
- 143 megawatts (simple cycle)
- 210 megawatts (combined cycle)

**same footprint** as GE’s current 9E

**fuel savings annually**: $5 Million

**UP TO:**
- $6 Million in additional revenue annually
