Introducing GE’s 9EMax

Delivering a game-changing leap in 9E gas turbine performance through a new 4-stage turbine module design.

UP TO:
- 53.5% efficiency combined cycle
- 37% efficiency simple cycle

OUTPUT UP TO:
- 143 megawatts (simple cycle)
- 210 megawatts (combined cycle)

UP TO:
- 32,000 hours maintenance intervals
- 900 starts
- $6 Million in additional revenue potential annually
- $5 Million in fuel savings annually

Supporting the Middle East/Northern Africa’s projected energy demand increase of 100+% by 2050

same footprint as GE’s current 9E
