Value across the organization

Rounds Pro empowers operators, supervisors and reliability and O&M managers with real-time, comprehensive asset health and condition monitoring. It enables team-wide collaboration to drive end-to-end reliability and maintenance efficiency.

Customers using GE Digital APM with operator rounds software see benefits in uptime, productivity and worker safety

<table>

Impact on daily team activities

**Mobile Operators**

Enhance personal productivity and program compliance.

- Operators efficiently take readings guided by an all-in-one app.
- Operators can view current and historical readings charts per asset.
- Reporting an issue, an operator takes photos and posts recommendations.

**Reliability and O&M Managers**

- Design and manage an efficient, flexible and compliant program.

**Rounds Supervisor**

- Schedule routes and assign them to mobile operators.
- Mobile operators collaborate freely to share rounds tasks and routes.

**Team-wide cooperation and collaboration**

- Mobile operators collaborate with their teams to drive reliability and maintenance.
- New and updated tasks can be immediately shared for operations and maintenance teams.
- EAM work order requests are submitted based on mobile operator recommendations.

**GE Digital brings you the full power of a modern rounds application seamlessly integrated within an overall APM solution.**
