# Digitize Manufacturing Operations for Global Plant Efficiency

## Challenge

- Secure additional orders with the same resources
- Decrease lead time by digitizing man experience and processes for production output optimization
- Increase overall quality with better process visibility and traceability
- Drive efficiencies and reduce energy costs

## Action

- Deploy GE Digital's end-to-end solution to digitalize manufacturing operations, from machines connectivity to dynamic dashboarding and analytics
- Provide expertise to optimize production output and improve quality yield
- Increase overall process and operations visibility

## Expected Results

- First site go-live within 10 months
- 14% lead time reduction
- Increase overall quality and revenue
