

Critical INFRASTRUCTURE @ Risk

Oil & Gas

Utilities

Transportation

Information security remains priority one, leaving critical infrastructure exposed.

CYBER SECURITY CONCERNS GROWING

To better understand the cybersecurity readiness of critical infrastructure organizations, Wurdtech commissioned market research firm YouGov to survey nearly 900 senior IT security decision makers at oil and gas, utilities, transportation, and healthcare organizations around the world.

Results illustrate the cyber challenges facing industrial companies.

50%

Had been attacked in the last 12 months

&

45%

Lack confidence in ability of IT to protect OT

HOW READY ARE YOU FOR A CYBER INCIDENT?

It's time to find out.
