

# ShipperConnect™

## Rating & Settlement

### Core Capabilities

- Bridges the gap between invoice data and shipment data
- Provides uniform execution and analytical tools which run across an organization
- Stores contracted rates for a given origin and destination
- Seamlessly integrates as a result of being a SaaS offering

### Differentiating Features

- “Engine” stores all freight rates for all carriers
- Manages all freight directions: Inbound, Outbound, 3rd party
- Manages all accessorial charges- fuel, residential, lift-gate, etc.
- Easily exports into spreadsheets for further analysis and reporting

### Optimized Outcomes

- Optimizes transportation routing and execution
- Bridges the gap between invoice data and shipment data
- Automatically reconciles electronic invoices against shipment records

### Improve efficiency and increase transportation efficiency.

Ever increasing supply chain complexities present challenges to shippers, carriers and logistic service companies alike. Managing multiple locations, multiple modes and complex supply chain pricing creates confusion and excess costs.

**ShipperConnect Rating & Settlement** provides users a powerful system to streamline execution and analytical tools across locations of an organization to increase supply chain visibility and operate all modes of transportation efficiently. This web-based tool provides accurate transportation rating and complete documentation for optimal routing and execution. The Audit module provides users with powerful data and real-time visibility into all transportation modes. This provides users the ability to ensure that payments are applied correctly and incorrect payments are adjusted accordingly. Real-time visibility to all transportation invoice information is available via a web portal.

**The result? Reduced delays and variability. Improved railcar processing. Simplified rail planning and execution. And increased productivity across your entire operation.**

**10% fuel savings certified by the EPA**
