

# ShipperConnect™

## Yard Management

### Core Capabilities

- Yard asset visibility
- Railcar inspection status
- Inbound/outbound workflow
- Order-to-railcar matching

### Differentiating Features

- Multiple yard management
- Built-in rail expertise
- Seamless integration (AEI, EDI, ERP)
- Quick to deploy (cloud-based)

### Optimized Outcomes

- Increase yard throughput
- Control product loss in the yard
- Minimize demurrage and detention

### Improve efficiency and connect with a superior yard management solution.

Without clear visibility into yard operations, efficient railcar management presents a challenge. Yard managers need to know where shipments are at all times and they need to control the movement of inventory throughout the environment. If they don't, yard managers struggle with congestion, shrinkage and demurrage.

Synchronize your entire industrial yard operation with **ShipperConnect Yard Management** from GE. With greater inbound and outbound railcar and inventory visibility, and the option to fully integrate with GE's Transportation Management System to interface directly with the serving railroad system—you can maximize throughput and productivity, and reduce the risk of delay, loss or contamination.

**The result? Optimal transportation plans. Better handoffs. Maximized railcar loadings and on-time order fulfillment.**
