

PROFESSIONAL SERVICES

PREDIX DOJO

If you've already signed up for Predix, your team is clearly chomping at the bit to get started on building world class IIoT applications. The best way to accelerate the building process is to ENTER THE DOJO.

During a Predix Dojo session, you and your team of 3-6 developers will plan, design, and sprint your way to your first Predix app. Our world class Sensei team consisting of developers, solution architects and agile coaches will help guide you through this 2-4 week hackathon journey as you learn IIoT design patterns and app development techniques.

Are you ready to enter the Predix Dojo?

APPROACH

PRE-WORK

Before we get started, your team needs to complete basic Predix training. You will then get organizational space on our platform, and build the "Hello World" application. After completing this basic app, your team will need to choose an idea for your first application and propose a basic solution architecture.

ONSITE DOJO SESSION

Once you are ready to start building your app, your team will spend one week with us at GE Digital in the beautiful Bay Area. You need to choose your team wisely as Cloud Foundry tools, backend programming, UI, Database and Security skills will help you run the Predix Dojo gauntlet. During our week we will harden your solution architecture and design, and take you through sprints where you will code, code some more, and then code a little more as you complete five 10-hour hackathon style sessions. You will leave GE Digital offices with an MVP of your application.

OFFSITE SUPPORT

As a wise man once said, you never really leave the Predix Dojo, but once you get back home, our team will continue to support you for an additional two weeks as you master the Predix platform stack. We will ensure your application is working and help guide your thinking for the rest of your roadmap and design. For additional sessions we can also take the Dojo on the road and meet you at your headquarters for further development.

DURATION + PARTICIPANTS

We hold one and two week sessions twice a month onsite at GE Digital. You will need at least three developers on your team with a maximum of 25 participants. We also offer customer onsite sessions for one or two weeks where a minimum of 15 developers are needed with a maximum of 25.

COST

GE Digital Onsite for one week is \$3k per developer - Onsite for two weeks is \$4.5k per developer

Customer Onsite is the same cost per developer + our team's travel and lodging for the session
