

GE Digital

Putting Industrial Data to Work

People who see data differently, see the world differently

Our customers are on the front lines of the world's toughest industrial challenges. Our years of hard-won insights in **power generation**, **utilities**, **oil & gas**, **manufacturing** and **aviation** mean we're uniquely positioned to help our customers better operate, optimize and analyze their operations to deliver greater results today – and in the future.

Power Generation

SPE/Sonelgaz serves more than 10 million customers across Algeria. SPE's investments in centralized remote monitoring at its GE-built monitoring center have led to cost reductions, and improved operational efficiency and performance across its fleet.

Grid

Using our DER and Orchestration software, **Southern California Edison** is expecting to add 5 million Distributed Energy Resources to the grid in the next 5 years, while currently providing 15 million people with electricity.

Oil & Gas

As part of its operational excellence initiative, Malaysia's national oil and gas company **Petronas** employed GE Digital's Asset Performance Management software to turn uncertainty into efficiency – across 14 plants and 125,000+ assets.

Manufacturing

One of the world's largest consumer goods manufacturers, **Procter & Gamble** turned to GE Digital's Proficy Manufacturing Execution Systems at enterprise scale to accomplish digitization step changes and achieve critical outcomes such as improved performance and reduced costs.

Aviation

Qantas is Australia's largest domestic and international carrier with 300+ aircraft, 7,300 flights per week and 55 MM passengers per year. Using our FlightPulse technology, Qantas pilots can now analyze their own flight data to discover areas to optimize operations and efficiency, while reducing risk, fuel consumption and carbon emissions.

Results achieved pre-COVID-19 global pandemic.

Operate

Through our depth of experience and expertise, we guide customers toward more efficient and impactful operations.

Analyze

The data is already there. We help empower customers to use it by making the complex simple, at unparalleled speed and scale.

Optimize

We co-innovate with our customers to implement new solutions and optimizations, helping them forge into the future with confidence and clarity.

At GE Digital, we're building a world that works by putting industrial data to work.

Because people who see data differently, see the world differently
