

# iFIX Complete

Get all the clients as you need – plus GE’s world-class HMI/SCADA reliability – at one, economical price

You don’t need to sacrifice reliability for “unlimited clients.” With iFIX Complete, you get it all.

At GE Digital, we know that claims about “unlimited clients” are attractive. We also know that to maintain stable, reliable operations, you need a truly world-class HMI/SCADA such as iFIX.

That’s why GE Digital is offering iFIX Complete – all the clients that you need at one, cost-effective price, delivering the proven HMI/SCADA and historian innovation used today by companies in nearly every industrial segment and every part of the world.

Need more clients? No problem. But, don’t put your equipment or plant at risk with software from other vendors that can become unstable with each Java update. GE understands the need for reliability; we’re an industrial organization, just like you. And we know HMI/SCADA.

Don’t make any sacrifices. Get reliability along with all the clients and core SCADA and historian capabilities that you need with iFIX Complete.

## What results will you get from iFIX?

With tens of thousands of installations around the world, an experienced network of system integrators, decades of rich development, and reliability that isn’t constrained by Java updates, iFIX is the trusted HMI/SCADA for your organization. Here are some real results achieved by iFIX customers:

- \$5 million saved per year through improved quality
- Zero downtime
- \$7 million in cost avoidance per year
- 35% decrease in product waste
- 80% decrease in emissions
- 5% increase in productivity
- 25% decrease in defects
- 20% decrease in investigation time
- 5% increase in production

## Why iFIX Complete?

- Get the proven and complete set of tools for your single-server HMI/SCADA project at one, economical price: Connectivity, Visualization, Data Logging, Notification, Analysis, and more.
- Get analyst-recommended, powerful historian capabilities including data analysis tools – not just a relational database like some vendors
- All the capabilities you need for your project with the flexibility to add as many clients as you want
- Easily swap client types due to architectural changes

## iFIX Complete includes:

- iFIX Plus Development/Runtime HMI/SCADA with 10,000 tags
- Proficy Historian (Essentials) with 10,000 tags plus A&E and redundant iFIX collectors
- iClient and iClient TS – As many iClients of any type as required per server
- IGS Basic – all protocol families, more than 200
- WIN-911 Essentials for alarm notification

*Note: Number of clients can affect performance. While you may choose your number of clients without limit, architect systems to available server resources and your desired performance.*

## Options Available to Meet Specific Requirements

- Redundancy: Ensure the highest uptime and availability by adding a second iFIX SCADA server for an additional 50%
- Electronic Signature: Perfect for Life Sciences/Pharmaceutical and other compliance-related applications
- Acceleration Plans: Take advantage of GE Digital’s award-winning Support
- Industrial Data Management: Scale with Proficy Historian’s Standard or Enterprise versions
- Notifications: Maximize functionality with WIN-911 Ultimate
- Connectivity: Premium drivers available
- Reporting: #1 industrial reporting software Dream Report
