

iFIX Value Package from GE Digital

Decision support for your operations

Increase profitability and productivity on any budget

Can you afford lost time?

How about lost productivity or revenue?

If your answer is "no," then you can't afford less than the best from your HMI/SCADA software.

Less than the best means you may not know when something goes wrong with your machines. You also don't know what really requires your operators' attention or how to decide what to address first.

At GE Digital, we believe HMI/SCADA software should do more than monitor your machines; it should support your decisions. We also believe that high value shouldn't come with a high cost.

Our best-in-class monitoring and visualization capabilities can make your team's decision-making more proactive and profitable than you've ever experienced—whatever your budget.

Today's SCADA is more than just monitoring and visualization. The HMI/SCADA should be a decision support system, enabling teams to drive the best performance. You can enable smart operators with decision support HMI/SCADA to increase efficiency and reduce costs.

Benefits

- Leverage your HMI/SCADA as the foundation for an efficient operation
- Drive the right response on the alarms that matter
- Increase consistency and conformance to standards
- Improve accountability on task completion
- Prevent mistakes, quickly identify problems, and get on-demand support

Increase profitability and productivity on any budget

Thousands of organizations use iFIX from GE Digital for its robust engine, rich set of connectivity options, open architecture, and scalability. Get the best with the iFIX Value Package:

	EMPOWER USER	DRIVE CONSISTENCY
	Connect, collect, visualize, and control	Guided actions, collaborative operations
Web HMI or Weospace clients included	3	5
iFix Plus Development - real-time tag count	1,500	10,000
WIN-911 Essential Add On	x	x
Historian Essential Add On (2500 buffer tags included)	500	1000
Alarming	x	x
Excel add-in to Historian for SCADA	x	x
Dream Report Starter Pack	x	x
Productivity Pack	x	x
Symbol Factory–Dynamos	x	x
Designers / development mode	x	x
IGS drivers - number of Protocol Families	2	3
Workflow clients for integrated SOPs—unlimited workflows		5
TOTAL PRICE	8,000 USD	11,000 USD

Increase profitability and productivity on any budget

iFIX Value Package components

Web HMI: Find information easily with a context-rich HMI based on the model structure, reduce time to solution with Efficient HMI out of the box, and achieve visualization where you need it with native responsive web design.

Webpace: A full-featured web client. Supports full control and visualization capabilities over your company Intranet or secure Internet without the need to change or alter your software application. It can be set up within minutes; it's also accessible from your iPad and Android device.

iFix Plus Development with real-time tags: Enable smart operators with a modern HMI/SCADA experience and tag counts to meet your needs for real-time data acquisition and alarm generation.

WIN-911 Essential Add On: Works with iFIX to provide real-time notification to monitor operations and notify personnel of problem conditions.

Historian: A powerful enterprise-wide data historian that collects, archives, and distributes tremendous volumes of production information at extremely high speeds. The industry's high performing, fast innovating, time-series data historian is also easy to use.

Alarming: Advanced alarm management includes seven priority levels, alarm transition counters, alarm inhibits and suppression, remote acknowledgement, and more. Define the alarm areas based on the physical or logical areas of your plant and/or process and assign alarm areas to operators, supervisors, and managers, so they can concentrate on their area(s) of responsibility.

Learn more about iFIX >

Excel add-in to Historian for SCADA: Excel add-in for simple data analysis.

Dream Report Starter Pack: A real-time report generator based on an easy, configurable user interface. Leverage your automation data to generate the reports you need to improve performance and meet your goals.

Productivity Pack: A suite of enhancements for iFIX that help lower the cost of ownership, improve usability, and make operations easier, faster, and more robust.

Symbol Factory-Dynamos: A full set of ready-to-use objects that will help you speed up the design process.

Designer/development mode: Configure your own operator screens, alarm strategy, and more.

IGS basic drivers: A choice of over 100 protocols for the most common devices in the automation industry

Workflow for integrated SOPs: Guide operators with clear, step-by-step, interactive work instructions and ensure the right actions, and reduce response and/or troubleshooting time, anywhere, anytime.

About GE

GE (NYSE: GE) is the world's Digital Industrial Company, transforming industry with software-defined machines and solutions that are connected, responsive and predictive. GE is organized around a global exchange of knowledge, the "GE Store," through which each business shares and accesses the same technology, markets, structure and intellect. Each invention further fuels innovation and application across our industrial sectors. With people, services, technology and scale, GE delivers better outcomes for customers by speaking the language of industry.
