

# Unleash the power of your APM investment

Accelerators build on the foundation of GE Digital's Asset Performance Management solution to improve outcomes and scale. Tapping energy subject matter expertise and best practices from GE Digital and its technology partners, Accelerators are pre-built data templates to build equipment health monitoring, root cause analysis, asset maintenance strategies, and business process workflows.

## Health & Reliability Accelerator value proposition

Setting up a Health & Reliability Process involves a number of steps:

- 01 SME data acquisition
- 02 Health indicator design & mapping
- 03 Deploy queries, policies, & dashboard
- 04 Testing & validation
- 05 Go live
