Predix Training and Certification

Training and Certification

Predix Education Services offers a broad catalog of training and certification options to help you start building apps faster and smarter, leveraging the power of [Predix](#)—the platform for the Industrial Internet. You'll embark on the leading edge of digital twin and edge-to-cloud computing.

From fundamentals to advanced functionality, our in-person and online classes cover mission-critical topics, including security, UI, asset modeling, cloud execution, analytics and data management. Take a 15-minute on-demand video course or a five-day boot camp. Topics are offered in multiple media to accommodate different learning styles.

Whether you're in the planning or implementation phase, our instructor-led and on-demand courses help you get the information you need in the format that works best for you.

Sample Courses

Developer Boot Camp

Accelerate knowledge and basic skills to begin building industrial applications using Predix. The course contains lectures, hands-on labs, and demonstrations to provide experience with specific concepts.

Architecting Predix Solutions

Using a series of application-based exercises, students collaborate in planning and designing how best to use its features and incorporate them into Predix solutions.

eLearning Videos

Our videos include self-paced courses that cover various topics, from an overview of Predix to implementing security.

Connecting Machines to a Predix Cloud

This course provides a detailed overview of the Predix Machine architecture, cloud connection protocols, and Predix SDK.

Certification

The Predix Certified Developer exam is a comprehensive assessment to gauge a developer's proficiency in various areas of Predix. The exam is taken online and proctored remotely.

Additional certification exams will be available in 2017. For pricing and scheduling information, please visit predix.io/resources/training or email predixtraining@email.ge.com.

Pricing

Pricing for courses and certification is available on predix.io/resources/training.

Group discounts are quoted upon request.

Benefits

By connecting machines, intelligence, and people, Predix is reshaping the companies that shape our world. And the role of developers couldn't be more critical. That's what makes training and developer certification an important and easy way to set yourself apart, establish credibility in the market, and bring value to your clients.

With our Predix Certified Developer exam, be the first among your peers to become Predix certified and take advantage of these benefits:

- Gain a competitive advantage over non-certified developers.
- Provide an authentic assessment of your investment—from training to implementation to go live.
- Be a part of the thriving Predix developer community; with your apps, innovate and bring meaningful impact to the IIoT marketplace.

Onsite and Custom Training

Have a group of 10 or more? Bring a Predix instructor to your location for a standard course or custom content can be created by request.

PREDIX

Learn More

Predix offers many more services, including services from third parties.

Intelligent Environments

Traffic Planning

Optimize operations and planning with vehicle traffic data.

Parking Planning

Optimize operations and planning with vehicle parking data.

Public Safety

Obtain media such as photos and video to enhance safety awareness.

Indoor Positioning

Capture mobile device indoor locations with 10cm accuracy.

Geospatial

Smallworld Intelligent Mapping

Enhance your asset and analytical data by visualizing and aggregating the data on a map.

Location Intelligence

Enhance every process, transaction, and decision with the power of location intelligence.

Operations

Logging

Manage all your app logs and save, search, and visualize them.

Business Operations

Measure and monetize your service with subscription management, entitlements control, metering, and revenue management.

List of Analytics

Anomaly Detection

Data Exploration and Preprocessing

Machine Learning

Feature Preparation
