Proficy CSense 8.0 from GE Digital
Industrial analytics software that improves asset and process performance with a Process Digital Twin

Optimize with 5-in-1 analytics capabilities in closed-loop solution

Proficy CSense from GE Digital uses AI and machine learning to enable process engineers to combine data across industrial data sources and rapidly identify problems, discover root causes, predict future performance, and automate actions to continuously improve quality, utilization, productivity, and delivery of operations.

Uniquely providing five analytics capabilities in one package, Proficy CSense has helped organizations around the world reduce costs by turning raw data into rapid business value. Engineers and data scientists can analyze, monitor, predict, simulate, and optimize and control setpoints in real time through Proficy CSense.

Additionally, Proficy CSense provides the capabilities to mine insight from historical data and rapidly develop, test, and deploy simple calculations, predictive analytics, and optimization and control solutions to reduce variability and improve operations.

Outcomes
- Deploy solutions that improve asset and process throughput, yield, quality, and efficiency by significant margins
- Mine new insight from industrial data to maximize return on assets
- Use data to troubleshoot causes of asset and process performance issues rapidly
- Increase productivity with visual analytics in a thin client
- Monitor and ensure health and performance of base-layer PID control loops
- Validate and clean raw sensor data at the source to ensure integrity of downstream systems

01 Mine new insight from data
Proficy CSense’s Troubleshooter enables engineers to rapidly troubleshoot continuous, discrete, or batch manufacturing process performance by mining insight from available sensor and production data. Seamless connectivity, rich visualization, and predictive analytics enable users to analyze operating scenarios, quantifying the impact that operational changes will have on key performance metrics and identifying causes for performance variation.

02 Improve production throughput, yield, quality, and efficiency
Proficy CSense’s Architect enables engineers to rapidly develop analytic solutions that typically improve production throughput, yield, quality, and efficiency with significant margin. A comprehensive solution-development environment provides visual analytic building blocks. This allows users to build and test calculations, predictive analytics, and real-time optimization and control. Solutions are enhanced with real-time and historical data sources and drag-and-drop access to rich functional libraries. Solutions are saved as reusable templates for easy deployment to similar assets or process units and permanently deployed into production using Proficy CSense’s Action Object Manager.

03 Enhance engineering productivity
Proficy CSense’s Architect also allows engineers to more easily capture expert knowledge and best practices—combined with insight mined from data with Proficy CSense’s Troubleshooter—into high-value analytic templates for rapid enterprise-wide deployment. Visual drag-and-drop analytics accelerate time to value and reduce dependence on data scientists and programmers. Online demos and the Proficy CSense interactive training course enable rapid mastery of the software with easy-to-follow demonstrations and guided simulations.

04 Leverage modern analytics visualization for faster response
Take advantage of modern, thin-client visualization with the included Proficy Operations Hub app: Process+ Control Loop Monitoring. This Web UI puts high-performance analytics at your fingertips, where and when you need it.

“Some systems are just too complex and have too many variables for operators to run optimally. That’s when we need the help of dedicated advanced-control intelligence that can deal with the complexities of our unique problems.”
Tim Spandiel
Manager, Impala Platinum’s Base Metals Refinery
Features

New in Version 8.0

• Modern, thin-client visualization with complimentary Proficy Operations Hub app: Process+ Control Loop Monitoring Web UI
• Auto-install SQL Express if no SQL present
• Easy to install and manage Python libraries with Python Module Manager
• Ability to load many TXT/CSV files in one operation
• Easier connectivity to Historian A&E data
• Aggregate and transpose datasets with fewer clicks
• No-code, deep-learning AI ML model deployment
• Rapid wizard-driven data mining for engineers for fast time-to-insight
• Built-in support for data quality to make real-time data cleaning and validation easy
• Comprehensive platform to develop, integrate, test, and deploy real-time solutions
• Easy visual drag-and-drop functional blocks for subject matter experts

Rich Analytics Feature Set, Easy Configuration

• Enables building rich analytic solution templates with no required programming
• Simple calculations, data cleaning, math, statistics, machine-learning models, real-time optimization, and advanced process control
• Plug-and-play connectivity to historical and real-time data sources and automation
• Rapid wizard-driven data mining for engineers for fast time-to-insight
• Built-in support for data quality to make real-time data cleaning and validation easy
• Comprehensive platform to develop, integrate, test, and deploy real-time solutions
• Easy visual drag-and-drop functional blocks for subject matter experts
• Access to script languages and CSense SDK for powerful analytic solutions with plug-and-play incorporation of Python, and third-party Net content

5-in-1 Proven Industrial Analytics Software

• 5-in-1 analytics solution: Analysis, Monitoring, Prediction, Simulation, and Optimization & Control of setpoints

Proficy CSense Licensing

Runtime Edition
• For permanent production, deployment, and management of analytic solutions
• Includes Architect and Run-time Action Object Services

Developer Edition
• For data analysis and analytic solution development and testing
• Includes both the Continuous and Discrete & Batch Troubleshooters, Architect, Run-time Action Object components for solution development and testing purposes only

Troubleshooter Edition
• For offline, ad hoc, and on-demand data analysis, process modelling, and troubleshooting
• Includes the Continuous and Discrete & Batch Troubleshooters, along with all data connectors

5-in-1 Proven Industrial Analytics Software

• 5-in-1 analytics solution: Analysis, Monitoring, Prediction, Simulation, and Optimization & Control of setpoints

Software Requirements

One of the following OS:
• Microsoft Windows Server 2016 or later (x86 and x64)
• Microsoft Windows 8.1 or later (x86 and x64)
Other Software Requirements (See online documentation for full list):
• Microsoft .NET 4.7.x
• Optional: Microsoft SQL Server 2014 SP2 or later (SQL Express editions are also supported, although not recommended for production environments)

Hardware Requirements

• 2GB available hard drivespace minimum. 20GB recommended for Troubleshooter and Runtime. 40GB recommended for Developer
• 8GB RAM for Troubleshooter (16GB recommended). 16GB RAM for Runtime and Developer (32GB recommended)
• 1 core at 2 GHz or faster for Troubleshooter (2 cores recommended). 2 cores at 2 GHz or faster for Runtime and Developer (4 cores recommended)
• 1024 x 768 screen resolution (1920 x 1080 screen resolution recommended)

Get maximum value out of data and optimize the performance of industrial assets with Proficy CSense analytics software.

LEARN MORE
Services

In the world of Industrial Internet of Things (IIoT), organizations are able to optimize productivity, reduce costs, and achieve Operational Excellence. While this is an exciting time for opportunity and growth, it can also bring on new challenges, questions, and uncertainty. No matter where you are on your IIoT journey, GE Digital has the right services offering for you.

**Advisory Services** We can help you plan and start your IIoT journey in a way that aligns to your specific business outcomes.

**Managed Services** We can help you maintain your critical machines from one of our remote locations around the world using model-based predictive analytic technology.

**Implementation Services** Our experienced global Automation partners can implement a collaborative, multi-generational program that marries your existing investments to the right enhancements and technology.

**Education Services** We specialize in education services to ensure that you’re leveraging our solutions to the fullest extent with our training and certificate programs.

**Acceleration Plans** Let us help by ensuring that your business continues to operate at its highest efficiency, all while mitigating risks to your investments.

**Security Services** Our solutions provide industrial-grade security for a wide range of OT network and application topologies.

Related Products for Your Digital Transformation Journey

GE Digital’s Proficy suite helps you precisely monitor, control, and visualize every aspect of your operations, enabling operators to make the best decisions faster. Transforming your business requires foundational innovations that lay the groundwork for future success.

**iFIX**
Gain visibility into your operations and secure agility for smarter decision making that drives results.

**CIMPLICITY**
Drive real-time visibility for smart operators with true client-server based visualization and control.

**Proficy Historian**
Optimize asset and plant performance through time-series and A&E industrial data collection and aggregation. Improve decision-making with advanced trend analysis.

**Proficy Operations Hub**
Guide operators with dynamic, interactive electronic work instructions and eSOPs for more consistent operations and optimized processes.

**Proficy Plant Applications**
Maximize overall equipment effectiveness (OEE), improve production scheduling, and ensure product quality by leveraging real time production data.

**Proficy Workflow**
Guide operators with dynamic, interactive electronic work instructions and eSOPs for more consistent operations and optimized processes.

About GE

GE (NYSE: GE) is the world’s Digital Industrial Company, transforming industry with software-defined machines and solutions that are connected, responsive and predictive. GE is organized around a global exchange of knowledge, the “GE Store,” through which each business shares and accesses the same technology, markets, structure and intellect. Each invention further fuels innovation and application across our industrial sectors. With people, services, technology and scale, GE delivers better outcomes for customers by speaking the language of industry.
