

# GE Gender Pay Gap Report 2021

## About GE

In 2022 GE is celebrating 130 years of innovation. Our installed base across GE Aviation, GE Power, GE Healthcare and GE Renewable Energy keeps us involved in the daily operations of our customers around the world. We've built a local presence, a strong brand, and deep customer relationships across ~ 170 countries.

## GE in the UK

GE employs more than 7500 people in the UK, occupying 20+ sites and contracting thousands of suppliers nationwide. We continually drive innovation, from testing the world's most powerful wind turbine, the Haliade-X, in Northumberland; handling the world's most fuel-efficient aviation engine, the GE9X, in Wales; to supplying more than 2 in 3 NHS hospitals with medical imaging equipment. GE plays a vital role in the growth and competitiveness of the country.

## Our Gender Pay Gap Report

In line with Government Regulations, GE is publishing its annual Gender Pay Gap report based on snapshot data from April 2021. GE has 8 legal entities which are in scope to report for 2021.

GE's overall gender pay gap is very narrow but varies widely between legal entities. Where the gap is larger, this is primarily driven by the lack of representation of female employees in industrial businesses and therefore reduced representation in senior and higher paid roles within engineering, technology, manufacturing and technical services.

The results show that female GE employees receive more bonus earnings on average. We believe that gender breakdown and the wide range of reward types captured in the data create certain data skews meaning it is difficult to draw clear inferences from these figures. The overall number of employees receiving a bonus has reduced this year due to measures taken in response to Covid-19.

GE regularly reviews its approach to pay equity and we are confident that we offer equal pay between our male and female populations undertaking comparable work.

GE continues to focus on ways to drive greater female representation in its businesses and in STEM (science, technology, engineering and mathematics) industries more broadly.

A negative (-) figure indicates females on average had higher pay or bonus earnings.

Note: the calculation methods under the Regulations have created some anomalies when applied to GE's benefits structure. For example, a car allowance is considered to be pay whereas a company car is not – this results in those receiving the same total compensation being shown as having different levels of pay.
