

Zeitplan: GE Events und Präsentationen auf der Achema
(täglich, 18.–22. Juni 2012)

Uhrzeit	Thema
10:00	Personal Safety and operation reliability of LV switchboards / Personenschutz und Anlagenverfügbarkeit bei Niederspannungsschaltanlagen (Industrial Solutions)
10:30	New blower technology bringing low total cost of ownership (Measurement & Control / Flow & Process Technologies)
11:00	Operational Excellence: Increased productivity and profitability in the chemical industry / Operational Excellence: Steigerung der Produktivität und Profitabilität in der Chemie-Industrie (Intelligent Platforms)
11:30	New solutions for ultrasonic liquid and gas measurement to enhance efficiency (Measurement & Control, Measurement & Sensing)
12:00	GE's new DCS generation – solutions on industrial automation standard products / Die neue GE DCS-Generation – Lösungen auf Standardprodukten aus der Automatisierung (Intelligent Platforms)
Mittagspause	
14:00	Moisture measurement in a new light with the Aurora TDLAS Hygrometer (Measurement & Control, Measurement & Sensing)
14:30	Pressure Relief Valves designed for dependability and for exceptional performance (Measurement & Control / Flow & Process Technologies)
15:00	Masoneilan Engineered Solutions dedicated to Customer's Severe Service Applications (Measurement & Control / Flow & Process Technologies)
15:30	Masoneilan Control Valves & Consolidated Safety Valves – Diagnostics capabilities from dedicated measurement tools
16:00	New Masoneilan solutions on digital instrumentation for enhanced control valve performance and improved diagnostics (Measurement & Control / Flow & Process Technologies)
