GE AVIATION IS TRAINING AND HIRING U.S. WORKERS NATIONWIDE
Learn more about how GE Aviation is training a pipeline of workers for the high-tech manufacturing jobs of the future.

2,000 U.S. Job Openings
GE Aviation is currently hiring in more than 20 states, filling positions from welders to engineers.

GE works with nearly 400 education partners to train future workers, including:

- In Hooksett, NH, we partner with Southern New Hampshire University, Manchester Community College, and Nashua Community College to train workers to help fill 132 openings.
- GE’s Lynn, MA, site employs about 2,600 employees, partners with the Lynn Vocational Technical Institute, and is training workers to help fill 265 positions. GE also partnered with Northeastern University in 2016 to create a Bachelor of Science in Advanced Manufacturing Systems.
- GE partners with Ivy Tech Community College, Purdue University, and Vincennes University in Indiana to train workers to help fill 95 openings.
- In Asheville, NC, we partner with Asheville-Buncombe Technical Community College and are looking to train workers to help fill 97 openings.
- In Evendale, OH, we partner with the University of Cincinnati to train workers to help fill 140 positions.

GE employees are among the highest paid in their communities, with hourly production workers making on average more than almost 90% of Americans in production roles. Learn more: ge.com/careers

From supporting nearly 20 STEM camps nationwide and donating $10 million in additive equipment to 300+ schools, to creating apprenticeship opportunities at tech and vocational schools and universities, GE is helping train workers for the future of manufacturing.
